This strategy document sets out the measures the Department for Work and Pensions intends to take to help achieve the Government's target to eradicate child poverty by 2020, based on the principle that improving employment opportunities for parents is the most sustainable route out of poverty for themselves and their children. These measures follow on from the 2007 Budget statement (HCP 342, session 2006-07; ISBN 9780102944556) and form part of the Government's cross-departmental strategy to tackle child poverty through a whole range of policy areas, including tax and benefits, health and housing, childcare and education. Measures announced include: i) extending the New Deal Plus for Lone Parents (NDLP Plus) to March 2011 and to cover all lone parents in London, and to

extend key elements of this support programme to two-parent families on benefit in the current pilot areas and throughout London; ii) extending the In-Work Credit for Lone Parents scheme (which provides an extra £40 per week for lone parents moving into work in 40 per cent of the country, including most of London) until June 2008 and to increase the rate payable in London to £60; iii) pilot schemes to link the In-Work Credit to adviser support to promote retention in work for lone parents, based on the Employment Retention and Advancement model; and iv) a major expansion of work-focused English as a Second Language provision, delivered through the cities strategy pilots in East and West London.

This book provides practical, business-orientated and accessible guidance on key aspects of German employment and labour law as well as adjoining fields. This second, completely revised edition presents the latest changes in German labour and employment law and jurisprudence. It covers, amongst other newer developments, the statutory minimum wage, changes in agency work, extensive changes in European and German employee data protection law, and includes a completely new chapter on compliance issues in the employment context. Specialised lawyers with many years of experience explain the legal basis of these aspects of German law, highlight typical practical problems and suggest solutions to those problems. In addition, examples are given on how to best manage legal pitfalls to minimise risks. This book translates employment and labour law for foreign in-house counsels and human resources managers at international companies and provides a clear understanding of the complex legal regulations in Germany.

Distinct from any other publication with statistics on Central and East European countries and the former Soviet Union, it reveals why and how new statistics are being collected and what still has to be done in order to make their national data compatible with the rest of the world. The authors discuss the problems involved in the measurement of employment (in both the state and the private sectors) and unemployment, the collection of reliable wage statistics, and the development of new economic classifications in line with those internationally recognized and adopted.

## **KEF Quarterly Review**

From bestselling writer David Graeber—“a master of opening up thought and stimulating debate” (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled “On the Phenomenon of Bullshit Jobs.” It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society’s most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. “Clever and charismatic” (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and “a thought-provoking examination of our working lives” (Financial Times).

The destruction of wildlife habitats organized crime AIDS illiteracy acid rain -- these are among the 130,000 topics documented and discussed in the new edition of the Encyclopedia. But its truly unique goal is to present this complex set of issues in ways that facilitate an organized response. To this end, the book also focuses on the complex relationship between problems and society's own ideological relationship with these problems. How do human priorities and perceptions aggravate or enable problems? What are the established and alternative responses? The Encyclopedia contains over 158,000 cross-references between entries, an extensive 91,000 practical key term index, bibliographies, and full cross-referencing to the Yearbook of International Organizations. For anyone concerned with the world community, here are the means to explore and participate in today's most crucial endeavors. A new addition to the work, Volume 3, Action -- Strategies -- Solutions, presents strategies for coping with world problems, with an emphasis on vicious self-sustaining cycles of problems.

The Work Programme is the latest government-contracted employment

programme, which aims to support long-term jobseekers into work and off unemployment benefits. Launched in June 2011, the Work Programme replaced a number of previous welfare-to-work programmes and consolidates employment support for a very wide range of jobseekers into a single mainstream programme. Providers, who are predominantly commercial companies, provide support to participants, and receive payments for finding participants sustained employment. In Wales one in nine people who joined the Work Programme in its first two years found sustained employment (defined as 13 or 26 weeks). This is the lowest rate in Great Britain, though not much lower than the average. The Committee's conclusions include: Working Links Wales and Rehab Jobfit-the two providers operating in Wales-must ensure that both they and their subcontractors have specific measures in place to support lone parents; and that Work Programme participants in Wales-unlike those in England-cannot access European Social Fund training and skills courses which is hampering the performance of the Work Programme in Wales and ultimately the opportunities available to the long-term unemployed. Similarly, DWP must enable participants to exit the Work Programme if required in order to access Jobs Growth Wales. The key issue here seems to be that there is a lack of flexibility in and between the various programmes set up to get people into work, and that this lack of flexibility appears to be more marked in Wales

Democratic governance faces unprecedented challenges across the OECD world

and beyond. Enormous strains will be placed on states' resources and their governing capacities to deal with the combined effects of the financial crisis, climate change, and demographic change. The basic foundations of established 'statehood' will be tested. At the same time, the architecture of the state has fundamentally changed over the past three decades. The Governance Report 2014 questions whether governments still have the capacities to respond. The Report develops a framework to explore the administrative capacities of the public sector in OECD countries, analyses how these capacities have been used to develop innovative policy approaches to key governance challenges, and explores governance innovations to enhance governance capacities. In addition, the Report presents a dashboard of indicators that assess administrative capacities from multiple perspectives. The Governance Report 2014 advances the debate on the problem-solving capacity of the modern state in the light of ongoing and future challenges.

Addressing a number of 'missing links' in the analysis of labour and its geographies, this volume examines how theoretical perspectives on both labour in general and the organizations of the labour movement in particular can be refined and redefined. Issues of agency, power and collective mobilizations are examined and illustrated via a wide range of case studies from the 'global north' and 'global south' in order to develop a better and fuller appreciation of labour market processes in developed and developing countries.
