The Practice of Leadership

Are leaders born or made? Does each society get the leaders it deserves? How-and why-is leadership 'rhetoric' different from leadership in reality? | Leadership is one of the most talked about yet least understood concepts in current business and society. This book explores how theoretical models and views of leadership have evolved over time; how leadership can be investigated from individual, organizational, and societal perspectives; and perennial dilemmas and emerging approaches in Leadership Studies. Positioning its discussion within a multidisciplinary framework that touches on management, sociology, philosophy, anthropology, history, literature, and politics, this book examines and critiques the common assumptions that inform the ways in which leaders and leadership are recognized, rewarded, and developed. It provides a valuable and thought-provoking overview for students and academics interested in leadership and management, practising leaders, leadership development consultants, and policy makers.

Making Sense of Change Management

The international bestseller—now with a new preface by author John Kotter. Millions worldwide have read and embraced John Kotter's ideas on change management and leadership. From the ill-fated dot-com bubble to unprecedented M&A activity to scandal, greed, and ultimately, recession—we've learned that widespread and difficult change is no longer the exception. It's the rule. Now with a new preface, this refreshed edition of the global bestseller Leading Change is more relevant than ever. John Kotter's now-legendary eight-step process for managing

change with positive results has become the foundation for leaders and organizations across the globe. By outlining the process every organization must go through to achieve its goals, and by identifying where and how even top performers derail during the change process, Kotter provides a practical resource for leaders and managers charged with making change initiatives work. *Leading Change* is widely recognized as his seminal work and is an important precursor to his newer ideas on acceleration published in *Harvard Business Review*. Needed more today than at any time in the past, this bestselling business book serves as both visionary guide and practical toolkit on how to approach the difficult yet crucial work of leading change in any type of organization. Reading this highly personal book is like spending a day with the world's foremost expert on business leadership. You're sure to walk away inspired—and armed with the tools you need to inspire others. Published by Harvard Business Review Press.

Crisis Leadership

"Nothing tests a leader like a crisis. The highly charged, dramatic events surrounding a crisis profoundly affect the people in an organization and can even threaten the organization's survival. But there are actions a leader can take before, during, and after a crisis to effectively reduce the duration and impact of these extremely difficult situations. At its center, effective crisis leadership is comprised of three things - communication, clarity of vision and values, and caring relationships. Leaders who develop, pay attention to, and practice these qualities go a long way toward handling the human dimension of a crisis. In the end, it's all about the people."

Power and Interdependence in Organizations

Leadership That Matters examines transformational leadership—leadership that not only improves productivity and performance but also makes a positive difference in the lives of organization members. Traditional leaders achieve superior results because of their ability to transform people from dutiful followers into self-directed leaders who go beyond simply doing what is expected of them. Drawing on research that investigates leadership, culture, and performance in dozens of organizations, the Sashkins describe the specific behaviors and personal characteristics of transformational leaders. They show how you can construct an empowering organizational culture that nurtures self-reliance and long-term thinking. They offer practical advice on how you can become a transformational leader—and make leadership matter.

This book includes contributions from top scholars who outline the best leadership practices for the benefit of the practicing leader. Each chapter focuses on a specific area of leadership practice and ends with a set of "take away" best practices in each area—an executive summary in reverse—that will serve as a quick reference for those who might want to peruse chapters, but still extract the best practices, as well as a summary for those who thoroughly read each chapter. "Jay Alden Conger and Ronald Riggio have brought together a galaxy of sophisticated yet practical experts on leadership, stressing both the complexity and indispensability of both transactional and transforming leadership, with the blessing of the pioneering student of leadership, Bernie Bass." —James MacGregor Burns, professor emeritus, Willams College, and Pulitzer Prize winner

Leadership in Organizations

Seminar paper from the year 2010 in the subject Business economics - Business Management, Corporate Governance, grade: 2,0, Vaxjo University, course: Leadership Theories, language: English, abstract: What makes a great leader great? What kind of skills does he use? Why are people still recognizing him for his behavioral skills? Is it possible to replicate those e.g. in business life? Gandhi was a leader of one of a kind. Not only did he see himself not as leader, but someone to help people reach their highest goals. He was truly inspirational and stood up for

ethical values that all too often got lost nowadays. Still many people worship them and would like to live up to them. His values and beliefs can easily be applied in business life by treating every human as such and are a wakeup call to organizations. As recent events as for instance the Financial Crisis have shown us, thinking about profit without moral behaviour will lead to devastating results. This work is mainly based on "Leadership in Organizations" by Gary A. Yukl and "The Three Faces of Leadership" by Hatch et al."

James Spillane, the leading expert in Distributed Leadership, shows how leadership happens in everyday practices in schools, through formal routines and informal interactions. He examines the distribution of leadership among administrators,

specialists, and teachers in the school, and explains the ways in which leadership practice is stretched over leaders, followers, and aspects of the situation, including routines and tools of various sorts in the organization such as memos, scheduling procedures, and evaluation protocols. This book is a volume in the Jossey-Bass Leadership Library in Education—a series designed to meet the demand for new ideas and insights about leadership in schools.

A Coach's Guide to Developing Exemplary Leaders

This book takes a look at how and why individuals display unethical behavior. It emphasizes the actual behavior of individuals rather than the specific business practices. It draws from work on psychology which is the scientific study of human behavior and thought processes. As Max Bazerman said, "efforts to improve ethical decision making are better aimed at understanding our psychological tendencies."

Leadership in Organizations, Global Edition

In today's complex work world, things no longer get done simply because someone issues an order and someone else follows it. Most of us work in socially intricate organizations where we need the help not only of subordinates but of colleagues, superiors, and outsiders to accomplish our goals. This often leaves us in a "power gap" because we must depend on people over whom we have little or no explicit control. This is a book about how to bridge that gap: how to exercise the power and influence you need to get things done through others when your responsibilities exceed your formal authority. Full of original ideas and expert insights about how organizations—and the people in them—function, *Power and Influence* goes further, demonstrating that lower-level personnel also need strong leadership skills and interpersonal know-how to perform well. Kotter shows how you can develop sufficient resources of "unofficial" power and influence to achieve goals, steer clear of conflicts, foster creative team behavior, and gain the cooperation and support you need from subordinates, coworkers, superiors—even people outside your department or organization. He also shows how you can avoid the twin traps of naivete and cynicism when dealing with power relationships, and how to use your power without abusing it. *Power and Influence* is essential for top managers who need to overcome the infighting, foot-dragging, and politicking that can destroy both morale and profits; for middle managers who don't want their careers sidetracked by unproductive power struggles; for professionals hindered by bureaucratic obstacles and deadline delays; and for staff workers who have to "manage the boss." This is not a book for those who want to "grab" power for their

own ends. But if you'd like to create smooth, responsive working relationships and increase your personal effectiveness on the job, Kotter can show you how—and make the dynamics of power work for you instead of against you.

Exploring Leadership

Organizational Behavior and Personnel Psychology

Theory and Practice of Leadership provides a comprehensive and critical review of the major theories of leadership and clearly lays out a more holistic understanding of leadership that integrates the disparate approaches and theories. Throughout the book, Roger Gill uses illustrative examples and cases, drawn from research and practice in the UK, mainland Europe, and the USA as well as Asia and elsewhere, enabling students to better relate the theories to real cases and their own experience. A clear picture of leadership theory and leadership development is set out through accessible language and a focus on bridging the gap between theory and practice.

MANAGING NONPROFIT ORGANIZATIONS This essential resource offers an overall understanding of nonprofits based on both the academic literature and practitioner experience. It shows how to lead, manage, govern, and structure effective and ethical nonprofit organizations. Managing Nonprofit Organizations reveals what it takes to be entrepreneurial and collaborative, formulate successful strategies, assess performance, manage change, acquire resources, be a responsible financial steward, and design and implement solid marketing and communication plans. "Managing Nonprofit Organizations is the only introductory text on this subject that manages to do three critical things equally well: It's comprehensive, covering all the key topics leaders of NPOs need to know about; it's practical, providing lots of examples, case incidents, and experiential exercises that connect the content to the real world; and, best of all (and most unique compared to others), it's research-based, drawing on the latest and best empirical studies that look into what works and doesn't work in the world of nonprofit management." —Vic Murray, professor, School of Public Administration, University of Victoria "This book is a rarity—a text that can be used both as the focus for academic study and as a source of stimulating ideas for those practitioners who want to explore theories about management and how they can be applied so they can do a better job. Tschirhart and Bielefeld have explained all aspects of nonprofit management and leadership in a way that will stimulate as well as inform." —Richard Brewster, executive director, National Center on Nonprofit Enterprise, Virginia Tech University "Managing Nonprofit Organizations presents a comprehensive treatment of this important topic. The book satisfies the competencies and curriculum guidelines developed by NASPAA and by NACC and would be ideal for instruction. The book

maintains its commitment to informing management and leadership throughout the nonprofit sector." —Jeffrey L. Brudney, Albert A. Levin Chair of Urban Studies and Public Service, Cleveland State University "This is an important book, written by two of the leading scholars in the nonprofit studies field. Nonprofit managers, board members, funders, educators, and others will find *Managing Nonprofit Organizations* extremely valuable." —Michael O' Neill, professor of nonprofit management, University of San Francisco "Here's the book that my students have been asking for—just the right mix of theory presentation, research findings, and practical suggestions to serve the thoughtful nonprofit management practitioner. It will inform, instruct, and ultimately, inspire." —Rikki Abzug, professor of management, Anisfield School of Business, Ramapo College

Behavioral Business Ethics

Your organization needs older workers more than ever: They transfer knowledge between generations, transmit your company's values to new hires, make excellent mentors for younger employees, and provide a "just in time" workforce for special projects. Yet more of these workers are reporting to people younger than they are. This presents unfamiliar challenges that--if ignored--can prevent you from attracting, retaining, and engaging older employees. In *Managing the Older Worker*, Peter Cappelli and William Novelli explain how companies and younger managers can maximize the value provided by older workers. The key? Recognize that boomers' needs differ from younger generations - and adapt your management practices accordingly. For instance:

- Lead with mission: As employees age, they become more altruistic. Emphasize the positive impact of older workers' efforts on the world around them.
- Forge social connections: Many older employees keep working to maintain social relationships. Offer tasks that require interaction with others.
- Provide different benefits: Tailor benefits--such as elder-care insurance programs or discount medication--to older workers' interests.

Drawing on research in management, psychology, and other disciplines, *Managing the Older Worker* reveals who your older workers are, what they want, and how to manage them for maximum value.
