Thomson reuters impact factor? - ResearchGate

The impact factor of a journal is calculated by dividing the number of current year citations to the source items published in that journal during the previous two years. It is denoted as a ratio between citations and recent citable items published. You can either refer to the Journal Citation Reports (JCR) or the Scopus® database to find the impact factor of the journal.

How can I find the impact factor and rank of a journal?

As of now about 50 journals, in which 20 journals and 100 conferences are presently dedicated to the obesity and its consequences, according to the recent results the obesity is a medical condition in which excess body fat has accumulated to the extent that it may have a negative effect on health, leading to reduced life expectancy and/or increased health problems.
