The Hurricane II Manual

Engineering Abstracts from the Current Periodical Literature of Engineering and Applied Science, Published Outside the United Kingdom

The Hawker Hurricane was the mainstay of the RAF during the early years of World War II. It saw extensive service in the Battle of Britain, over the Mediterranean and even saw action on the Eastern Front. Reliable, sturdy, rugged and effective this fighter proved itself time and again in action against the Luftwaffe. With a 1,260 horsepower Merlin engine the Hurricane was, for its time, one of the best fighters ever produced. This detailed, technical manual reveals the technology behind the Hurricane's fighting ability. It examines the aircraft's engine, armament, controls, design and technical specifications to give a clear picture of the plane's strengths and limitations. Technical drawings, electrical plans and cockpit photographs support the text. The Hurricane II Manual is a facsimile of the original official workshop manual - used by the personnel who flew and maintained the aircraft - first published in the 1940s.

Explosionproof Electrical Equipment

These official Saab manuals are the only factory-authorized, comprehensive, single source of service information and specifications available. Whether you're a professional technician or a do-it-yourselfer, these manuals will help you understand, care for, and repair your Saab. Everything from fundamental automotive concepts and maintenance procedures to complex electrical system troubleshooting and complete engine overhaul is clearly explained. Critical updates and information from the Saab Service Information Manual, the Parts & Service Information System and Saab Service Training have been included, as well as fast, proven repair procedures and tips used by Saab technicians.
