Master storyteller Sonya Hartnett crafts a magical and moving fable about war and redemption . . . and what it means to be free. When the Germans attack their Romany encampment during World War II, Andrej and his younger brother, Tomas, flee through a ravaged countryside under cover of darkness, guarding a secret bundle. Their journey leads to a bombed-out town, where the boys discover a

hidden wonder: a zoo filled with creatures in need of hope. Like Andrej and Tomas, the animals--wolf and eagle, monkey and bear, lioness and seal, kangaroo and llama-- have stories to share and a mission to reclaim their lives.

A sweeping assessment of the state of higher education today from former Harvard president Derek Bok *Higher Education in America* is a landmark work--a comprehensive and authoritative analysis of the current condition of our colleges and universities from former Harvard president Derek Bok, one of the nation's most respected education experts. Sweepingly ambitious in scope, this is a deeply informed and balanced assessment of the many strengths as well as the weaknesses of American higher education today. At a time when colleges and universities have never been more important to the lives and opportunities of students or to the progress and prosperity of the nation, Bok provides a thorough examination of the entire system, public and private, from community colleges and small liberal arts colleges to great universities with their research programs and their medical, law, and business schools. Drawing on the most reliable studies and data, he determines which criticisms of higher education are unfounded or exaggerated, which are issues of genuine concern, and what can be done to improve matters. Some of the subjects considered are long-standing, such as debates over the undergraduate curriculum and concerns over rising college costs. Others are more recent, such as the rise of for-profit institutions and massive open online courses (MOOCs). Additional topics include the quality of undergraduate

education, the stagnating levels of college graduation, the problems of university governance, the strengths and weaknesses of graduate and professional education, the environment for research, and the benefits and drawbacks of the pervasive competition among American colleges and universities. Offering a rare survey and evaluation of American higher education as a whole, this book provides a solid basis for a fresh public discussion about what the system is doing right, what it needs to do better, and how the next quarter century could be made a period of progress rather than decline.

In the past businesses have viewed water as a minimal operational cost and not a strategic issue. However, water has now emerged as a critical issue for both corporations and the public sector in response to increased water demand, climatic risks and potentially negative impacts on brand value. This innovative book provides up to date information on global water issues and describes how companies can not only address these challenges but also implement high value global water strategies. It shows: Why water is a critical business issue for companies which now face water risk to their operations and brands; How new concepts such as embedded water and virtual water are forcing companies to think differently about how they use water to manufacture products; That companies need to develop a corporate water strategy to manage it as a key business issue

and capture the real value of water; How companies can develop partnerships with non-governmental organizations to implement water strategies

## **Practical Thinking**

In Practical Thinking de Bono's theme is everyday thinking, how the mind actually works - not how philosophers think it should. Based on the results of his famous Black Cylinder Experiment (a critical thinking task that asks participants why they think a black cylinder falls over), de Bono explores the four practical ways of being right. From there he picks out and names the five levels of understanding - and the five major mistakes in thinking. With Edward you'll learn exactly why we all make them.

"An original, fascinating, and beautifully written reckoning . . . of that great human passion: to write."—Kay Redfield Jamison, national bestselling author of *An Unquiet Mind* Why is it that some writers struggle for months to come up with the perfect sentence or phrase while others, hunched over a keyboard deep into the night, seem unable to stop writing? In *The Midnight Disease*, neurologist Alice W. Flaherty explores the mysteries of literary creativity: the drive to write, what sparks it, and what extinguishes it. She draws on intriguing examples from medical case studies and from the lives of writers, from Franz Kafka to Anne Lamott, from Sylvia Plath to Stephen King. Flaherty, who herself has grappled with episodes of compulsive writing and block, also offers a compelling personal account of her own experiences with these conditions. "[Flaherty] is the real thing . . . and her writing magically transforms her own tragedies into something strange and whimsical almost, almost funny."—*The Washington Post* "This is interesting, heated stuff."—*San Francisco Chronicle* "Brilliant . . . [a] precious jewel of a book . . . that sparkles with some fresh insight or intriguing fact on practically every

page.”—Seattle Post-Intelligencer “Flaherty mixes memoir, meditation, compendium and scholarly reportage in an odd but absorbing look at the neurological basis of writing and its pathologies . . . Writers will delight in the way information and lore are interspersed.”—Publishers Weekly

The Giant Pool is the sequel to Shell Exchange. They have adventures with many larger and scarier creatures including moray eels, a black-tip reef shark and fish-eating birds. They also have dealings with fish-cleaning stations run by cleaner shrimp and cleaner wrasse. Matty needs a larger shell, in the middle of all this, and they have to deal with a cyclone. The story is illustrated with photographs taken by the author. There is an extensive reference list and glossary included for children who would like to learn more about this beautiful and fascinating place and its inhabitants.

What if you could reboot your health, tap into your creative self, reclaim your wild nature, lead from your heart—and still feel well rested? As modern women, we're taught that we can do it all, have it all, and be it all. While this freedom is beautiful, it's also exhausting. Being a “worn-out woman” is now so common that we think feeling tired all the time is normal. According to Karen Brody, feeling this exhausted is not normal—and it's holding us back. In *Daring to Rest*, Brody comes to the rescue with a 40-day program to help you reclaim rest and access your most powerful, authentic self through yoga nidra, a meditative practice that guides you

into one of the deepest states of relaxation imaginable. It's time to lie down and begin the journey to waking up. Though it comes from the yogic tradition, yoga nidra doesn't look like a typical yoga class—the entire practice is done lying down. As you listen to a guided meditation, you're gently taken into complete inner stillness, effortlessly releasing into a healing state that works on both cellular and subtle body levels. With *Daring to Rest*, Brody presents a comprehensive yoga nidra program that unfolds in three phases: rest for physical exhaustion, release for mental and emotional exhaustion, and rise for tuning in to the “life purpose exhaustion” that can come when we're not in our full power. Each phase includes a downloadable yoga nidra guided meditation and supportive practices. “By directly accessing your subconscious mind, yoga nidra helps shift the long-held patterns that prevent you from stepping fully into your purpose and power,” writes Brody. “Now is the time to break the cycle of fatigue and return to your truest self—the woman you are when you're not constantly exhausted.”

values, the way we look after our children and elderly, or whether we trust and help strangers. It is a hidden dimension of inequality, and helps to explain why governments have found it so hard to reduce gaps in society. There are also deep cracks in this hidden wealth, in the form of our rising fears of crime, immigration and terror. Using a rich variety of international comparisons and new analysis, the book explores what is happening in contemporary societies from value change to the changing role of governments, and offers suggestions about what policymakers and citizens can do about it.
