Getting your Canon Speedlite to produce the light you need can be a real challenge. For those new to flash photography—or for anyone who has previously given up out of frustration—*Speedlitter's Handbook* is a revelation. Photographer Syl Arena takes you on a journey that begins with an exploration of light and color, moves through a comprehensive discussion of the Canon Speedlite family and all of the accessories and equipment available to the Speedlitter, then settles down to crafting great light in one photo shoot after another. Whether you want to create a classical portrait, shoot an event, or simply add a little fill light to a product shot, *Speedlitter's Handbook* shows you how. A fantastic in-depth resource illustrated with over 500 images, *Speedlitter's Handbook* covers: how to see the various characteristics and properties of light itself, as well as the differences between how your camera sees versus how you see all the buttons and dials of the entire Canon Speedlite family the basics of on-camera flash...and the necessity of getting your flash off the camera how to beautifully balance flash with the existing ambient light all the equipment necessary for great Speedlite shots how to get amazing shots with just one Speedlite how and when to use E-TTL versus manual flash the use of color gels to balance color, as well as create dramatic effects how to tame the sun—or any really bright light—with hi-speed sync and much, much more Whether you're shooting portraits, events, or sports, *Speedlitter's Handbook* is an essential resource that teaches you how to craft the light you need for any type of shot you want.

Nikon D5000 - Magic Lantern Guides

FOR THE FIRST TIME EVER, YOU'LL LEARN ALL THREE ASPECTS OF WHAT IT TAKES TO CREATE STUNNING PORTRAITS (HINT: IT'S NOT JUST THE LIGHTING) Scott Kelby, the world's #1 best-selling author of photography books, Editor-in-Chief and Publisher of *Photoshop User* magazine, and Publisher of the just-released *Light It* magazine, has reinvented how lighting books are written by finally revealing the

entire process from start to finish. You see everything from the complete lighting setup (and all the gear used), to the shoot (including all the camera settings and a contact sheet of the progression of the shoot), to the all-important part that most books don't dare include—the post-processing and retouching in Photoshop. This book also breaks new ground in the visual way it teaches you the lighting setup. There aren't any sketches or 3D models—you see the lighting layout in a full-page photo, taken from above during the live shoot, so you can see exactly where everything's positioned (the subject, the photographer, the lighting, the background—you name it—you see it all). Plus, you'll see side, over-the-shoulder, and more behind-the-scenes views, so you can absolutely nail the lighting every time. LEARN THE LIGHTING SETUPS THE PROS USE Each year, Scott trains thousands of professional photographers during his Light It. Shoot It. Retouch It. LIVE! seminar tour and now, for the first time ever, he's taken that incredibly popular style of learning and put it into book form. Now everyone can have a real-world reference for getting the same looks today's clients are clamoring for. You'll learn: The step-by-step layouts for creating the most-requested and sought-after lighting looks How to get more out of one light than you ever thought you could (this is worth it alone!) How to control and shape your light without breaking the bank The camera settings, gear, and power settings for every shot The retouching techniques the pros really use to make their subjects look their very best How to retouch hair, eyes, lips, skin, and lots of other little retouching tricks that make a really big difference How to create high-contrast portrait effects without buying expensive plug-ins A host of insider tricks, invaluable shortcuts, and kick-butt special effects to give you a real advantage over the competition Plus, Scott includes a special bonus chapter that shows how to create these same studio looks using off-camera hot shoe flashes and the modifiers made for them. There's never been a book like it.

Some photographers make portraits that we can't take our eyes off of. These images create mood, evoke emotion, and pique our curiosity. They have that certain something that other portraits seem to lack. These rare images are memorable—the kind of shots that clients want and photographers strive to emulate. These portraits are technically precise and have style. Neil van Niekerk is a big name in the portrait and wedding photography industry. His masterful photographs get a reaction, and he's devoted to helping others create compelling portraits for their clients. In this book, van Niekerk shows readers strategies for creating a wide range of portrait looks (romantic, fun, sweet, dramatic, glamorous, or moody) in lackluster, middle-of-nowhere locales, small home studios, big expanses, and even on rooftops. Starting with traditional lighting and posing strategies and moving through "spicier" varieties, he shows readers how integrating specialized lighting (rim lighting, backlighting, flare, and low-key lighting—using natural light and artificial sources) and compositional approaches (shallow depth of field, lens compression, and unorthodox perspectives) into their creative approach can allow them to take full creative control over their portrait-taking process so that they're able to deliver incredible shots of their clients in any photographic conditions.

When it comes to photography, it's all about the light. After spending more than thirty years behind the lens—working for National Geographic, Time, Life, and Sports Illustrated—Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he knows how to create it using small hot shoe flashes. In The Hot Shoe Diaries, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Whether he's photographing a gymnast on the Great Wall, an alligator in a swamp, or a fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing.
