Malcolm Fraser believes passionately that, whatever our politics, humanitarian issues are the 'common ground' we all share. This thoughtful and often provocative analysis reveals a man who cares deeply about Australia and its people. In *Common Ground*, Fraser explores: How Australia is positioned in the Asian region and within a new world order Whether globalisation can work for rich and poor alike, rather than creating greater inequality and environmental degradation Why governments that claim to take a global view of money should also take a compassionate, global view of people Why reconciliation with Aboriginal Australia is essential for a humane, generous and fair nation Compassionate and inspiring, *Common Ground* makes a compelling case for those who honour the concept of a fair go for all.

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.
