The Bookseller

Our relationships with marine mammals are complex. We have used them as resources, and in some places this remains the case; viewed them as competitors and culled them (again ongoing in some localities); been so captivated and intrigued by them that we have taken them into captivity for our entertainment; and developed a lucrative eco-tourism activity focused on them in many nations. When we first envisaged this special topic, we had two overarching aims: Firstly, we hoped to generate critical evaluation of some of our relationships with these animals. Secondly, we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer-reviewed literature. We were also asking ourselves a question about what responsibility mankind might have to marine mammals, on our rapidly changing planet? The answer to the question; can, or should, humans have responsibility for the lives of marine mammals when they are affected by our activities? - is, in our opinion, 'yes' - and the logical progression from this question is to direct research and effort to understand and optimise the actions, reactions and responses that mankind may be able to take. We hope that the papers in this special issue bring some illumination to a small selection of topics under this much wider topic area, and prove to be informative and stimulating.

Warfighting is an authentic American philosophy of action that will thrill the millions of fans of SunTzu's The Art of War and Musashi's The Book of Five Rings. This modern classic of strategy and philosophy is the quintessential guide to prevailing in competitive situations, be it war, work, play, or daily living. Sometimes life is war and sometimes business is war and sometimes you need to call in the Marines. Over the past two hundred years, the Marines have developed a reputation for getting the job done—fearlessly, boldly, and taking no prisoners. What better role model for the hidden warriors in ourselves? What better advice to call on when the stakes are high and sensitivity just isn't going to work? Written in 1989 as a philosophical and strategic guide-book for the US Marine Corps, Warfighting is a worthy successor to SunTzu's The Art Of War. With clarity, brevity, and wisdom, it describes the basic forces at work in every competitive situation whether on the field of battle, in the boardroom, or in the courtroom. With twentieth-century technology and its emphasis on speed and versatility, the rules of war and competition have changed. Warfighting's exploration of maneuver warfare takes readers beyond Sun Tzu's classic lessons and provides them a more thorough understanding of what it takes to fight and win in the

modern world. Currency's edition of Warfighting features interviews with famous former Marines including F. Lee Bailey, Ed McMahon, and Donald Regan. They tell how they have used the Marine Corps' battle strategies of strength and straightforwardness as their secret weapons in every confrontation, whether at a corporate, departmental, or personal level.
