100 hilarious essays, based on blindingly obvious questions, from the creators of Geeks Who Drink—led by six-time Jeopardy! champion, Christopher D. Short. The best trivia questions are usually the ones that are right on the tip of your tongue—so obvious that you may not know the answer offhand, but you should. In Duh, America's foremost masters of pub quiz, Geeks Who Drink, will take trivia lovers on a voyage through 100 of our face-palmiest questions. Along the way, we'll explore the blind hills and corners that make random knowledge so much fun. In hilarious, informative, bite-size essays, we'll explore such not-really-mysteries as: -How many stars are on the Texas state flag? -Odlaw is the nemesis of what kid book character? -What's the last word in the King James Bible? Even if you already know the "what"—and you might not!—we'll fill in the "why." And the when,

where, and how. By the end you may feel dumber, but you'll be smarter. We almost guarantee it! By the way, that would be one (lone) star, Waldo, and "Amen." Duh!

One Thousand Questions and Answers on Jewels of Knowledge and Trivia

Where were Venetian blinds invented? What color is the black box on a commercial airplane? Where did India ink originate? * Most of us know more than we think we know. We also think we know more than we actually do-because some of what we think we know simply "ain't so." We all harbor misconceptions that are accepted not only because they are popular but also because they make sense. It makes sense to believe, for example, that German chocolate originated in Germany rather than the truth: that German chocolate is so named because it was created by Sam German. It seems logical to believe that Mercury is the hottest planet because of its proximity to the sun, or that buttermilk contains butter, that Danish pastry is from Denmark, and that the boat race America's Cup was named after the United States of America. In Sorry, Wrong Answer, Rod Evans takes readers on a tour of misleading trivia, debunking commonly held assumptions and sharing surprising "right" answers. *Answers: Japan; Orange; China

Does the Bible Have Any Answers?

“With an upbeat tone, clever dialogue, and an artsy point of view, Depth of Field is one relatable teenage girl’s contemporary coming-of-age journey” (School Library Journal). Two weeks in New York City should be the time of Pippa’s life: she’s attending the prestigious Tisch Photography Camp. But what should be fourteen unforgettable days of bliss turns into chaos when her one and only nemesis, Ben Baxter, proves to be surprisingly more complex than she could’ve ever imagined,

and her Tisch mentor, a renowned photographer, seems to have a lot more to do with her parents' past than anyone wants her to know. Is Pippa out of her depth? Picking up where she left off in *The Rule of Thirds*, Pippa Greene returns in *Depth of Field*, a story full of the same heart, comedic touches, and romance that made readers fall in love with Chantel Guertin's charming YA series. "Amusingly honest . . . Frothy yet engaging romance with a snapshot of the photography world to add color." —Kirkus Reviews "Pippa is an appealing heroine and this will find readers." —VOYA "Tight plotting, vivid characters, and an underlying thread of photography know-how make *Depth of Field* a smart and stylish read." —The National Reading Campaign "Guertin truly inhabits the world of a talented 16-year-old who, in spite of self-doubt, faces the world head on. And if the story is one that has been told many times, many ways, Guertin's approach to it is creative and new." —CM: Canadian Review of Materials

Connect Teachers Edition 4

Written for those interested in the topic of "shared knowledge" in organizations, this edited volume brings together a variety of themes and perspectives that emerge when multidisciplinary scholars examine this important subject. The papers were presented at a conference designed to bring together behavioral scientists who were interested in the creation, conversation, distribution, and protection of knowledge in organizations. The editors bring together a distinguished group of social psychologists who have made important contributions to social cognition and group processes. They cast a wide net in terms of the topics covered and challenged the authors to think about how their research applies to the management or mismanagement of knowledge in organizations. The volume is divided into three sections: knowledge systems, emotional-motivational systems, and communication and behavioral systems. A final conclusion chapter discusses and integrates the various contributions.
