## **AMC Muscle Cars : Muscle Car Color History**

Anybody who wanted to go toe to toe with the Big Three in the 1960s had to produce credible muscle cars. American Motors Corporation did exactly that with the SC Rambler and the incredibly fast AMX. Some argue, however, that AMC's insistence on pouring its relatively limited resources into the "muscle wars" ultimately led to its demise. Illustrated throughout with modern photography of restored and factory-original cars, archival images, AMC concept drawings, period advertisements, and cutaway illustrations, this color history primarily focuses on the conception, development, production, and

performance of the AMX, as well as the Javelin upon which it was based. Special models like the Mark Donohue Signature Edition Javelin, along with the less-than-well-received Marlin, Rebel, SST, Hornet 360, Gremlin X, and others are also included.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

Its never happened before-a dead body discovered in a highly secured location of a nuclear power plant. Was it an inside job? And could it affect the outcome of the upcoming election and cause the shutdown of the nuclear power plant? Will Lindy Andrews figure out before it is too late that theres also a plot to cause a deadly leak of radiation that could affect thousands of nearby residents? The convergence of the publics need for electricity and the need for energy, the interests of environmentalists, the media, politicians, and the male-dominated world of nuclear power generation provides a backdrop to the current problems associated with power generation in the United States. Will Lindy Andrews, a rare female in the male-dominated world of nuclear power generation, be able to solve the mystery?

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United

States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.
