Chapter 18: Classification, 18.1-18.3 Flashcards | Quizlet

Taxonomy is a branch of biology that concerns the naming and classifying organisms based on their similarities and dissimilarities in their characteristics. Phylogeny is the branch of science which concerns the evolutionary relationship of a species or a group of species with a common ancestor. Thus, the key difference between taxonomy and phylogeny is that taxonomy involves naming and

classifying organisms while phylogeny involves the evolution of the species or groups of species.
