Morning Jumpstarts: Math (Grade 1)

There are no dress rehearsals in life and you only get one shot at a scene -- why not make it as good as it can be? In *Be the Star You are!* Cynthia Brian proves that you already possess everything you need to be the producer, writer, director, and star of your own life. Cynthia shares 99 lessons (or gifts) that teach you to cherish your past, focus on your assets, dream of the future, and celebrate each moment.

School, Family, and Community Partnerships

Provides suggestions for activities to help new classes get acquainted, along with letters to parents, seasonal bulletin boards, and clip art

5-Minute Math Problem of the Day

Kickstart your class with five daily 5–10 minute routines, all of which include content-specific examples, extensions, and variations for high school mathematics. This resource offers a year’s worth of daily instructional material that you can use to begin each class period, and will help students Frequently revisit essential mathematical concepts Foster and shore up conceptual understanding Engage in mental mathematics, leading to efficiency and fluency Engage in mathematical discourse by constructing viable arguments and critiquing the reasoning of others Reason mathematically, and prepare for high stakes assessments Move learning beyond

“correctness” by valuing mistakes and discourse and encouraging a growth mindset

Illustration Workshop

One of a series of early reading books with large print and colour illustrations, this is the story of Holly, Spider and Sam at the seaside. They are too full of food to swim, so they pass the time trying to outdo each other's storytelling.

Three by the Sea

"This resource supports new and experienced educators who want to prepare for and design purposeful number talks for their students; the author demonstrates how to develop grade-level-specific strategies for addition, subtraction, multiplication, and division. Includes connections to national standards, a DVD, reproducibles, bibliography, and index"--Provided by publisher.

Making Thinking Visible

20 step-by-step lessons and 80 word problems to help students master the proven Singapore bar modeling method and boost their test scores!

Piano Music for Little Fingers

Eager for adventure, CJ follows the directions of a map anonymously mailed to him.

Guided Math: A Framework for Mathematics Instruction

This book describes a humanistic approach to implementing programs and systems that bring academic press, social support, and relational trust together in unique ways. Based on the understanding that old beliefs are changed by supporting new behaviors, the approach includes acquiring and using data in innovative and intentional ways. Properly conducted, the approach results in high morale, a sense of inclusiveness and success, increased efficacy, and improved metrics in all areas of education. The book includes the research and theory behind the approach, action steps for leaders, and lessons learned in the process—useful elements of success for any school.

Daily Routines to Jump-Start Math Class, High School

A complete guide for improving the focus and engagement of your special education students by starting the day off right Use a morning meeting to jump-start your students' day! This simple but effective classroom technique has been proven to help students learn better, build friendships, improve behavior and gain confidence. Reading & Math Practice, Grade 2

Contains reproducible activity pages designed to help sixth grade students build skills in mathematics for standardized tests and to meet the Common Core State Standards

Cj and the Mysterious Map

A proven program for enhancing students' thinking and comprehension abilities Visible Thinking is a research-based approach to teaching thinking, begun at Harvard's Project Zero, that develops students' thinking dispositions, while at the same time deepening their understanding of the topics they study. Rather than a set of fixed lessons, Visible Thinking is a varied collection of practices, including thinking routines?small sets of questions or a short sequence of steps?as well as the documentation of student thinking. Using this process thinking becomes visible as the students' different viewpoints are expressed, documented, discussed and reflected upon. Helps direct student thinking and structure classroom discussion Can be applied with students at all grade levels and in all content areas Includes easy-to-implement classroom strategies The book also

First Grade Big Fun Workbook

These 101 math jokes are hilarious -- you can count on it! Calling all math-letes and math geeks: Yes, the whole idea of math jokes might seem a little strange, but these are really two funny -- in fact they are prime. Go figure! Why did I, V, and X keep wandering off? Because they're roman numerals! What happened when 8 lay down? He felt infinitely better! How did King Arthur reward the brave circle? He dubbed him Sir Cumference. People think math is too serious. They need to lighten up and be a little odd!

Morning Jumpstarts: Math (Grade 6)

Contains reproducible activity pages designed to help second grade students build skills in vocabulary, grammar, spelling, writing, reading comprehension and fluency, and handwriting.

Problem Solved Bar Model Math, Grade 6

Full of encouragement and guidance and presented in a practical lay-flat binding, *Illustration Workshop* is the ultimate creative tool for today's indie illustration zeitgeist.

Problem Solved Bar Model Math, Grade 3

Presents 250 multi-step math problems for students in grades four through eight, covering whole numbers, decimals, fractions, measurement, geometry, percents, ratio, and probability, and algebra and statistics; and includes an answer key.

Powerless to Powerful

The third volume in this series for pianists ages 4 to 9, this book contains more songs in the already familiar key of G. New topics include the key of F and extended hand positions with six-note melodies, plus the IV chord in all keys, dotted rhythms, dynamics, staccato and legato touches, and two-note and longer phrases. Heartwarming Family Circus cartoons appear throughout the book. "Of all the piano instruction books and courses out there, yours is the best by far, because it combines theory, fun, a wonderful variety of songs, and of course, the 5-point learning plan.

Thank you for providing such a fantastic piano course for children!" — Beverly Short, Santa Monica, California "You've really found a wonderful way of making music fun for children with your songs. The songs are infused with spirit, so it makes learning truly enjoyable for students." — Monica Le, Fullerton, California "I love these books because they work! I have been using them for many years with children 4 years old and up. The big notes make note learning easy and the directions for teachers are clear and methodical. My students and their parents are excited as they graduate from one level to the next. These books truly teach little fingers to play! Thank you, Ann Patrick Green!" — Carol Orozco, Fullerton, California "I use Ann Patrick Green's books with every student. The larger note size, the use of solfege note reading, the inclusion of theory and the way each book is organized makes teaching and learning easy and fun." — Lisa Smith, piano teacher

Morning Meetings for Special Education Classrooms

Includes 10 color cards and 10 shape cards. Cards measure 9" x 12".

sheet reinforces essential skills with quick exercises, such as Sentence Busters, Magic Numbers, Analogy of the Day, and more. A great way to prepare kids for standardized tests! For use with Grades 2-4.

Be the Star You Are!

Use a practical approach to teaching mathematics that integrates proven literacy strategies for effective instruction. This professional resource will help to maximize the impact of instruction through the use of whole-class instruction, small-group instruction, and Math Workshop. Incorporate ideas for using ongoing assessment to guide your instruction and increase student learning, and use hands-on, problem-solving experiences with small groups to encourage mathematical communication and discussion. Guided Math supports the College and Career Readiness and other state standards.

Problem Solved Bar Model Math, Grade 4

This beginning guide to economics will have readers thinking about the purpose, and not just the value, of money. From bartering, early forms of currency, credit cards, and digital payment, here is a clear and thorough introduction to money.

Skill-Building Morning Jumpstarts

Building Powerful Numeracy for Middle and High School Students brought the world of research on numeracy at the elementary level to the secondary

Get Free Morning Jumpstarts Math Grade 6 Answers

level, helping teachers build numeracy in their students and showing how that work supports students in understanding higher math. Now, Pam Harris continues her work by offering lessons and activities that promote her strategies for teaching as much mathematics as possible with as little memorization as possible. Two types of activities for building numeracy are included in this workbook: Student Workouts include reproducible worksheets that students can work on independently or in pairs, followed by robust class discussion to promote understanding of the ideas. Teacher Directed Activities are whole-class mini-lessons designed to help students construct numerical relationships as they work with the teacher. While the student workouts provide starting points for students to build important numerical relationships and choose effective strategies, the teacher directed activities provide opportunities for discussing, comparing, modeling, verbalizing strategies, finding and describing patterns, and making generalizations. Together they help develop the mathematical habits of mind that students need for higher math.

Money Madness

Give math routines a makeover in your classroom and make every minute count. Captivate your elementary students with these new, innovative, and ready-to-go mathematics routines!
