Cholesterol Management: ACC/AHA Updates Guideline

ATP III Guidelines At-A-Glance Quick Desk Reference. Determine lipoprotein levels—obtain complete lipoprotein profile after 9- to 12-hour fast. ATP III Classification of LDL, Total, and HDL Cholesterol (mg/dL) Identify presence of clinical atherosclerotic disease that confers high risk for coronary heart disease (CHD) events (CHD risk equivalent): Clinical CHD.

2018 Guideline on the Management of Blood Cholesterol

Feb. 4, 2019. About one in three Americans has high cholesterol. The body needs cholesterol to function normally, but too much of this waxy, fat-like substance builds up in the arteries and may lead to serious problems like heart attack and stroke. The American College of Cardiology and the American Heart Association recently released new guidelines to help physicians and their patients take a more proactive — and personalized — approach to their cardiovascular risks.

What do the new cholesterol guidelines mean? A
