## **The Photographer's Mind**

The source of any photograph is not the camera or even the scene viewed through the viewfinder-it is the mind of the photographer: this is where an image is created before it is committed to a memory card or film. The aim of this book is to answer what makes a photograph great, and to explore the ways that top photographers achieve this goal time and time again. As you delve deeper into this subject, *The Photographer's Mind* will

provide you with invaluable knowledge on avoiding cliché, the cyclical nature of fashion, style and mannerism, light, and even how to handle the unexpected. Michael Freeman is the author of the global bestseller, *The Photographer's Eye*. Now published in sixteen languages, *The Photographer's Eye* continues to speak to photographers everywhere. Reaching 100,000 copies in print in the US alone, and 300,000+ worldwide, it shows how anyone can develop the ability to see and shoot great digital photographs.

### **Photographer's Guide to the Nikon Coolpix P900**

A new expression of Carson's famously original way of seeing, 'fotografiks' are curiously fleeting images that seem to have been lifted out of their mundane

context and abstracted to another realm. Anecdotal captions provide philosophic comments on the nature of the photographs, aspects of the page design and observations on the process of assembling parts to form a whole. Possibly the most influential graphic designer working today, David Carson has been profiled by several of the world's leading publications including Newsweek and The New York Times, and has won an award from the International Center for Photography in New York for "the best use of design with photography." He creates cutting edge advertising for a number of high profile clients including Nike, Microsoft, MTV, Jaguar, Ray-Ban and Sony. David Carson: Fotografiks will appeal to anyone interested in experiencing a fresh method of visual communication.
