Macedonian Folklore

This is the edition including all three books. The so-called Hermetic writings have

been known to Christian writers for many centuries. The early church Fathers (Justin Martyr, Tertullian, Clement of Alexandria) quote them in defense of Christianity. Stobaeus collected fragments of them. The Humanists knew and valued them. They were studied in the sixteenth and seventeenth centuries, and in modern times have again been diligently examined by many scholars. G. R. S. Mead has issued a translation of the whole body of extant literature, with extended prolegomena, commentary, etc. There is a wide difference of opinion as to the date at which this literature was produced. Mead believes that some of the extant portions of it are at least as early as the earliest Christian writings, while von Christ assigns them to the third Christian century, and thinks that they show the influence of neo-Platonism. To affirm that they influenced New Testament usage would be hazardous, but they perhaps throw some light on the direction in which thought was moving in New Testament times.

Having witnessed many failures, this book sets out the Methods, Artefacts and Environment required to effectively choose and operate an EA Modelling Tool. It covers the key things that must be done to effectively and efficiently; choose a tool, and then to operate it in a sustainable way.

Of Isis and Osiris

Leica Camera Repair Handbook

This book builds on the basics, and teaches techniques that refine your camera repair skills. Whether you tinker with cameras or own a repair shop, this book is a necessity. The ideal companion to the top selling Camera Maintenance & Repair (Book 1). Clear step-by-step techniques for repair of popular, modern cameras; over 175 detailed photos & illustrations show camera parts and the specifics of disassembly and repair; and special instructions for over 100 camera models and

lenses - from Bronica to Zuiko!

A Greek Grammar

New Religious Movements in the Twenty-First Century

This text provides a comprehensive textbook summarizing the presentation, workup, and surgical solutions for common emergencies in the cancer patient. The use of medications (antibiotics, hormones, and biologic therapies) and interventional radiologic procedures as adjuncts or as replacements for the surgical solutions are discussed. The text covers emergencies that result as adverse effects for the systemic and local treatments for cancer, emergencies that result from mechanical issues with the cancer and those that result from surviving major extirpative surgery. Diagnosis and treatment of patients' immune-compromised or thrombocytopenic status from chemotherapy is discussed, as is surgical treatment in patients with prior complex surgical therapy or radiation treatment. Finally, the text covers alternatives to surgery, including new interventional radiologic and endoscopic procedures. Surgical Emergencies in the Cancer Patient will be of great value to healthcare professionals at all levels who are involved in the treatment of emergencies in the cancer patient. It is meant for a wide group of individuals,

including medical students, residents in surgery and internal medicine, fellows in surgery and oncology, and practicing oncologists and surgeons. This work is meant to be a textbook for the student, a guide for the practitioner, and a reference for the general oncologist.

The History of the Japanese Camera

81/2 x 10 Since publication this title has proved to be very popular for both the serious lens user wishing to understand more about his lenses, as well as the Leica enthusiast considering which lens would be suitable to add to his outfit. Do you know your "Coma from your Aberrations"? If "Yes," then part 2 of Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.

Mikhail Tal was one of the greatest geniuses of chess history. The magician from Riga, as he was known because of his dazzling attacking games, took the chess

world by storm and in 1961, at the age of twenty-three, he won the world championship. His sacrificial style made Tal immensely popular with chess players all over the world. In this book Grandmaster Karsten Muller and chess journalist Raymund Stolze have created an instructional chess tactics guide by investigating and explaining the secrets of his breathtaking combinations. Moreover, the authors have selected from the games Tal played one hundred exercises which will teach amateurs how they can finish a game with a stunning sacrifice.

The Etruscan Language

Leica Lens Compendium

This well-illustrated volume provides the best collection of Etruscan inscriptions and texts currently in print. A substantial archeological introduction sets language and inscriptions in their historical, geographical, and cultural context. The overview of Etruscan grammar, the glossary, and chapters on mythological figures all incorporate the latest innovative discoveries.

From February 24 -28, 1992 an international symposium on Durability of Disease Resistance was held at the International Agricultural Centre in Wageningen, the Netherlands. The symposium, organized by the Department of Plant Breeding of Wageningen Agricultural University and the Centre for Plant Breeding and Reproduction Research, CPRO-DLO, was part of the DGIS funded programme Durable

Resistance in Developing Countries. Without any form of prevention or protection nearly all crops will be seriously or even severely damaged by a range of pathogens. In modern agriculture man has been able to control many if not most pathogens using i) pesticides, ii) phyto sanitary methods such as control of seed and plant material in order to start a crop disease free, iii) agronomic measures such as crop rotation, iv) disease resistance or combinations of these measures. Over the years the use of pesticides has increased enormously and so did the problems associated with pesticide use, such as environmental pollution and building of resistance and tolerance to these pesticides in the pathogens. The use of resistance too increased strongly over the years and here too problems arose.

Durability of Disease Resistance

Moralia, in Fifteen Volumes, with an English Translation by Frank Cole Babbitt;

The Fujifilm X100S is a digital camera with a 23mm fixed prime lens. It is intended for amateurs to semi-professionals who want a camera that allows them to make great images faster and with less hassle than any other digital camera. While the camera manual explains what the camera can do, it doesn't show exactly how to use the camera to create great images! That's where Fujifilm X100S: From Snapshots to Great Shots comes in. Starting with the top ten things users need to know about the camera, author Kevin Mullins carefully guides readers through the operating features. Readers get practical advice from a pro on which settings to use when, great shooting tips, and end of chapter assignments. From Snapshots to Great Shots is a beautiful how-to photography series that provides the perfect blend of instruction, inspiration, and reference for specific camera models and photography concepts. Featuring a clear, elegant design; outstanding images that

educate and inspire; and a friendly, accessible voice, this series helps photographers get great shots every time they pick up their camera.

In this book, X-Pert Corner columnist and workshop mentor Rico Pfirstinger teaches you all about the capabilities of the Fujifilm X series lineup of cameras, which he's discovered through years of in-depth research, experience, and experimentation. No matter which X series camera you own—whether it be the X-T3, X-H1, X-T2, X-Pro2, X100F, X-T20, X-E3, GFX, or any other Fuji X series camera—Rico cuts to the chase and provides a plethora of tips and practical instructions not found in user manuals or anywhere else. With this knowledge, you will be able to take full advantage of your X series camera.

The Fujifilm X series boasts amazing features, but some users may require an adjustment period if they are new to these cameras—even photographers who have been lifetime DSLR shooters. This guide will help you to quickly feel comfortable using your camera so that you can achieve excellent results.

Rico reveals many hidden features, functions, and procedures, so photographers of every level—beginners, enthusiasts, and experienced pros—will learn new and better ways to use their Fuji X series camera to its full potential. Beyond beneficial practices for all X series shooters, Rico also covers advanced concepts, such as the capabilities of Fujifilm's ISOless sensors with Dual Conversion Gain, and offers solutions for common issues, such as inaccurate focus or RAW conversion artifacts.

New Religious Movements in the 21st Century is the first volume to examine the urgent and important issues facing new religions in their political, legal and religious contexts in global perspective. With essays from prominent NRM scholars and usefully organized into four regional areas covering Western Europe, Asia, Africa, and Australia, Russia and Eastern Europe, and North and South America, as well as a concluding section on the major themes of globalization and terrorist violence, this book provides invaluable insight into the challenges facing religion in the twenty-first century. An introduction by Tom Robbins provides an overview of the major issues and themes discussed in the book.

Evoking a Sense of Place

And therefore the desire of truth, especially in what relates to the Gods, is a sort of grasping after divinity, it using learning and enquiry for a kind of resumption of things sacred, a work doubtless of more religion than any ritual purgation or charge of temples whatever, and especially most acceptable to the Goddess you serve, since she is more eminently wise and speculative, and since knowledge and science (as her very name seems to import) appertain more peculiarly to her than any other thing. For the name of Isis is Greek, and so is that of her adversary Typhon, who, being puffed up through ignorance and mistake, pulls in pieces and destroys that holy doctrine, which she on the contrary collects, compiles, and delivers down to such as are regularly advanced unto the deified state; which, by constancy of sober diet, and abstaining from sundry meats and the use of women, both restrains the intemperate and voluptuous part, and habituates them to austere and hard services in the temples, the end of which is the knowledge of the original, supreme, and mental being, which the Goddess would have them enquire for, as near to herself and as dwelling with her.

Introduction to Healthcare in a Flash!

Learn from the Legends is a modern classic. ChessCafe chose it as their Book of the Year and IM Jeremy Silman went even further when he wrote: I cant recall having seen a better book in the last two decades. Ten years after the original publication, Quality Chess is proud to offer a revised hardback edition with a new

chapter on the latest chess legend, Magnus Carlsen. Mihail Marin examines and explains the ideas of the legends who shaped modern chess. The chapters in this book discuss: Rubinsteins excellent rook endgame technique; Alekhines expertise with the heavy pieces; Botvinniks ability for deep analysis; Tals handling of heavy pieces vs. minor pieces; Petrosians positional exchange sacrifices; Fischers strength with the kings bishop; Karpovs handling of bishops of opposite colour; Korchnoi the rebel; Carlsen the new king.
