Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

This book focuses on the relationship between the auto industry and the built environment at multiple scales, a topic of particular interest now as the industry is going through a period of major transformation. Drawing from multiple perspectives, including architecture, urban design and urban planning, the authors examine the changing form of the auto factory itself, the changing geography of auto production, and the challenges faced by communities as the auto plants that once brought them prosperity, and often a sense of identity, leave town. They examine four places that are dealing in different ways, and with varying success, with the aftermath of a decommissioned auto plant in their midst. These are Janesville, Wisconsin, and Willow Run, Michigan, in the U.S., and Bochum, Germany, and Genk, Belgium, in Europe. Together these four cases provide some clues about what the future might look like for places that were once intimately connected with the manufacture of cars.

The Asian financial crisis of 1997-98 shook the foundations of the global economy. What began as a localized currency crisis soon engulfed the entire Asian region. What went wrong and how did the Asian economies, long considered "miracles," respond? How did the United States, Japan and other G-7 countries react to the crisis? What role did the IMF play? Why did China remain conspicuously insulated from the turmoil raging in its midst? What lessons can be learnt from the crisis by other emerging economies? This book provides answers to all the above questions and more. It gives a comprehensive account of how the international economic order operates, examines its strengths and weaknesses, and what needs to be done to fix it.

It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Just a Spoonful of Laughter Helps the Medicine Go Down

In 1726, nearly forty years after Peter Allix' Dissertation on the Angel of the LORD was published, the Dutch pastor and theologian Gerard De Gols set out to bring the profound insights of Allix to a new generation in a new way. This work aims at being a systematic and biblical exposition of Christ in the Old Testament. We have taken portions of the larger work and modernized the language and punctuation in order to reach our own generation with these old truths known by so many Christians in days gone by, but often forgotten or mis-understood today. The first half deals with Christ as equal to the Father in a series of parallel texts that cover the attributes of God. The second half takes us through the main actors of the OT and proves beyond a doubt that each of them both knew and worshiped Jesus Christ as the Supreme God. Focusing specifically on worship, the pastoral importance of this work for anyone wanting to grow deeper in their knowledge and love of Jesus Christ cannot be overstated. De Gols work aims at the heart by going through the head. "Some ancient rabbis viewed the Angel of Yahweh as a hypostatization of God. Many church fathers took that a step further and identified the Angel as the pre-incarnate Christ. Scholars of the Protestant Reformation affirmed Christ's pre-incarnate presence in the Old Testament, including Gerard De Gols. Not every text De Gols adduces, or argument he marshals, is equally convincing. But the cumulative force of his exegesis is persuasive and his thesis irresistible: the Son of God is recognized and worshiped as God not only in the New Testament but also in the Old. What's more, as John the Baptist prepared the way for Christ, this little volume will prepare the reader for Matt Foreman and Doug Van Dorn's much anticipated and forthcoming work on the Angel of the LORD."
