Japan remains one of the dominant economic powers. Yet the Japanese economy is one of the most misunderstood phenomena in the modern world. Conventionally, Japan is presented as the exception to mainstream economic theory: an exception to the standard models of modern economics. This book demolishes that notion, bringing the full analytical power of economic thought to all aspects of the most dramatic economic success story in recent times. David Flath concentrates on four main themes: Japan's economic growth and development; Japan's integration with the world economy; Government policies and their effects; Economic institutions and practices. By applying common economic tools such as the Solow growth model, Modigliani's life-cycle model of saving, Becker's theory of investment, Samuelson's theory of revealed preference, Coase's exposition of the problem of social cost, and the modern theory of industrial organization, this book shows that the mainstream principles of economics apply in Japan as successfully as they do elsewhere. Revised and updated to take account of recent developments in Japanese banking and macroeconomics, this book is an indispensable resource for students and instructors alike. Lucid explanations and comprehensive and rigorous analysis make it natural choice for anyone interested in comprehending the rise of the Japanese economy.

### **Economic Survey of Latin America and the Caribbean 2014**

The Economic Survey of Latin America and the Caribbean 2014 looks at how economic growth in the region has been slowing since 2011, and the data available for the first six months of 2014 indicate that the region will not match the growth rate of 2.5% recorded in 2013. Growth has been muted over the first few months of the year, owing to stagnant gross fixed capital formation and faltering private consumption. Government consumption, on the other hand, has picked up, and the net contribution of exports has been more positive than during the same period of the previous year. A regional growth rate of 2.2% is forecast for 2014.

After we've come to faith in Christ, God leaves us in this world for a very clear purpose: his own glory. But how are we to glorify God for the rest of our lives? The Bible reveals that God has laid before every Christian two infinite journeys which we are to travel every day: the internal journey of growth into Christlike maturity, and the external journey of worldwide evangelism and missions. This book is a road map for the internal journey, laying out how we are to grow in four major areas: knowledge, faith, character, and action. In this book, we'll learn how God grows us in knowledge, faith, character, and action. We'll also discover that spiritual knowledge constantly feeds our growing faith, faith will transform our character, our transformed character will result in an array of actions more and more glorifying to God, and our actions will feed our spiritual knowledge. This upward spiral will lead us to become more and more like Jesus Christ in holiness. And not only will this book help us understand Christian growth in detail, it will also give us a passion to grow every day for his glory.

### **The Economic Crisis in Social and Institutional Context**

This book explores the foundations of the current economic crisis. Offering a heterodox approach to interpretation it examines the policies implemented before and during the crisis, and the main institutions that shaped the model of advanced economies, particularly in the last two decades. The first part of the book provides a theoretical analysis of the crisis. The roots of the 'great recession' are divided into fundamentals with origins in financial liberalisation, financial innovation and income distribution, and complementary or contributory factors such as the international imbalances, the

monetary policy, and the role of credit rating agencies. Part II suggests various paths to recovery while emphasizing that it will be necessary to develop alternative strategies for sustainable economic recovery and growth. These strategies will require genuine political support and a new 'great European vision' to address major issues concerning the EU such as unemployment, structural regional differences and federalism. Drawing on various schools of thought, this book explains the complexities of the crisis through a wider evolutionary-institutional and heterodox framework.
