The second in a series of highly practical, hands on, step-by-step photographic manuals, Replacing Your Boat's Electrical System fills a gap in the market for the DIY boat builder and repairer. It is a subject covered only in piecemeal fashion by the yachting press, which, like general boat repair manuals, can't go into the level of detail Micke Westin does. This is a visual, hand-holding guide, dwelling on the details as it explains each procedure rather than focussing on the theory (which is relegated to an appendix, for those who wish to go further).

The Cardboard Boat Book

The Total Boating Manual

A step-by-step instruction manual on how to build a lightweight 'environmentally-friendly' boat with recyclable resources. The boats simply fold up from ¼" thick cardboard obtaining their strength from the geometry of the component parts. The boats are 8-feet long, weigh about 25-pounds, and can accommodate a 250-pound person without risking structural damage. Each boat is constructed with 21-pieces of cardboard that are used to make 7-component parts. The 7 parts are assembled together with 'environmentally-friendly' contact cement and paper drywall tape. Once assembled the boats are sealed with an 'environmentally-friendly' water-based waterproof coating. No special tools are required and they are very simple to build. All of the materials used to build a boat are typically found at 'do-it-yourself' home improvement stores. The boats can be outfitted with 12-volt electric fishing motors, although they are typically propelled with traditional Kayak style paddles.

Irwin & Rippe's Manual of Intensive Care Medicine has established itself as an invaluable reference for students, interns, residents, fellows, nurse practitioners and physician assistants, nurses, and respiratory care practitioners working in the critical care medicine environment. Known for its reader-friendly outline format and compact portable size, this handy manual builds upon its tradition of excellence in its Sixth Edition. Available both in print and electronic formats, the Sixth Edition parallels the text, Irwin & Rippe's Intensive Care Medicine, Seventh Edition, and features fully updated and revised content with a focus on patient safety. • Fully revised content addresses recent developments, including the larger role for ultrasound, in critical care medicine. • Annotated references are provided at the close of each chapter to guide the interested reader through key articles in the relevant literature. • Video clips have been added where appropriate to reinforce key points and findings. • Logical organization begins with an extensive section on Procedures and Techniques, followed by 15 sections covering organ system problems as well as palliative care, legal and ethical issues, and transplantation. • Thorough coverage of pharmacology, poisonings, and overdoses presented in a tabular format. • New section editors share a wealth of experience and expertise targeted to broaden readers' skills.
