Discontinuity in Nonlinear Physical Systems explores recent developments in experimental research in this broad field, organized in four distinct sections. Part I introduces the reader to the fractional dynamics and Lie group analysis for nonlinear partial differential equations. Part II covers chaos and complexity in nonlinear Hamiltonian systems, important to understand the resonance interactions in nonlinear dynamical systems, such as Tsunami waves and wildfire propagations; as well as Lev flights in chaotic trajectories, dynamical system synchronization and DNA information complexity analysis. Part III examines chaos and periodic motions in discontinuous dynamical systems, extensively present in a range of systems, including piecewise linear systems, vibro-impact systems and drilling systems in engineering. And in Part IV, engineering and financial nonlinearity are discussed. The mechanism of shock wave with saddle-node bifurcation and rotating disk stability will be presented, and the financial nonlinear models will be discussed.

LRRPs had to be the best. Anything less meant certain death. When Ed Emanuel was handpicked for the first African American special operations LRRP team in Vietnam, he knew his six-man team couldn't have asked for a tougher proving ground than Cu Chi in the summer of 1968. Home to the largest Viet cong tunnel complex in Vietnam, Cu Chi was the deadly heart of the enemy's stronghold in Tay Ninh Province. Team 2/6 of Company F, 51st Infantry, was quickly dubbed the Soul Patrol, a gimmicky label that belied the true depth of their courage. Stark and compelling, Emanuel's account provides an unforgettable look at the horror and the heroism that became the daily fare of LRRPs in Vietnam. Every mission was a tightrope walk between life and death as Emanuel's team penetrated NVA bases, sidestepped lethal booby traps, or found themselves ambushed and forced to fight their way back to the LZ to survive. Emanuel's gripping memoir is an enduring testament to the valor of all American LRRPs, who courageously risked their lives so that others might be free. From the Paperback edition.

PRAISE FOR HORRID HENRY "Henry's over-the-top behavior, the characters' snappy dialogue, and Ross's hyperbolic line art will engage even the most reluctant readers." Herald Henry's naughtiness is a yardstick against which children can get a sense of their own moral goodness and social justice "What is brilliant about the books is that Henry never does anything that is subversive. She creates an aura of supreme naughtiness (of which children are in awe) but points out that he operates within a safe and secure world." Emily Turner, Angels And Urchins Magazine Reaches the most important age group - children who are learning to read "I have tried out the Horrid Henry books with groups of children as a parent, as a babysitter, and as a teacher. Children love to either hear them read aloud or to read them themselves. The books are spot on for the 5-8 age range and are fun for the adults who share them too." Danielle Hall, Teacher The structure provides new readers with a real sense of accomplishment "My son is 7 years old and a big Horrid Henry fan. This book lived up to his expectations! Horrid Henry is like most boys: he always has a plan and is always getting into mischief! It was amusing, and he could not put it down. Can't wait for the next. This book contains the full proceedings of the 2015 Academy of Marketing Science Annual Conference held in Denver, Colorado. Marketing has become ubiquitous: it doesn't matter who you are, where you are or what you are doing, you cannot escape it. In these times of instantaneous news, information and entertainment, everyone is exposed to messages from the moment they awake until the minute they drift off to sleep. America spends the most money in the world on advertising and other marketing communication. So, it could be said that marketing is America's pastime, as much so as the classics: baseball, hot dogs, and apple pie. Under the theme of " Celebrating America's Pastimes: Baseball, Hot Dogs, Apple Pie and Marketing", this volume discusses all of the good things that marketing can do. Showcasing research from academics, scholars and practitioners from around the world, this volume provides insight and strategies that will help marketers move forward and focus on the positive that marketing can provide to consumers, stakeholders and society. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the

Twenty years after the fall of the Berlin Wall, the question remains 'Do good fences still make good neighbours'? Since the Great Wall of China, the Antonine Wall, built in Scotland to support Hadrian's Wall, the Roman 'Limes' or the Danevirke fence, the 'wall' has been a constant in the protection of defined entities claiming sovereignty, East and West. But is the wall more than an historical relict for the management of borders? In recent years, the wall has been given renewed vigour in North America, particularly along the U.S.-Mexico border, and in Israel-Palestine.

But the success of these new walls in the development of friendly and orderly relations between nations (or indeed, within nations) remains unclear. What role does the wall play in the development of security and insecurity? Do walls contribute to a sense of insecurity as much as they assuage fears and create a sense of security for those 'behind the line'? Exactly what kind of security is associated with border walls? This book explores the issue of how the return of the border fences and walls as a political tool may be symptomatic of a new era in border studies and international relations. Taking a multidisciplinary approach, this volume examines problems that include security issues ; the recurrence and/or decline of the wall; wall discourses ; legal approaches to the wall; the 'wall industry' and border technology, as well as their symbolism, role, objectives and efficiency.

The Human Condition is a response to the growing disenchantment in the Western world with contemporary life. John Kekes provides rationally justified answers to questions about the meaning of life, the basis of morality, the contingencies of human lives, the prevalence of evil, the nature and extent of human responsibility, and the sources of values we prize. He offers a realistic view of the human condition that rejects both facile optimism and gloomy pessimism; acknowledges that we are vulnerable to contingencies we cannot fully control; defends a humanistic understanding of our condition; recognizes that the values worth pursuing are plural, often conflicting, and that there are many reasonable conceptions of well-being. Kekes emphasizes the importance of facing the fact that man's inhumanity to man is widespread. He rejects as simple-minded both the view that human nature is basically good and that it is basically bad, and argues that our well-being depends on coping with the complex truth that human nature is basically complicated. Finally, Kekes argues that the scheme of things is indifferent to our fortunes and that we can rely only on our own resources to make what we can of our lives.

A New Yorker writer revisits the seminal book of her youth--Middlemarch--and fashions a singular, involving story of how a passionate attachment to a great work of literature can shape our lives and help us to read our own histories. Rebecca Mead was a young woman in an English coastal town when she first read George Eliot's Middlemarch, regarded by many as the greatest English novel. After gaining admission to Oxford, and moving to the United States to become a journalist, through several love affairs, then marriage and family, Mead read and reread Middlemarch. The novel, which Virginia Woolf famously described as "one of the few English novels written for grown-up people," offered Mead something that modern life and literature did not. In this wise and revealing work of biography, reporting, and memoir, Rebecca Mead leads us into the life that the book made for her, as well as the many lives the novel has led since it was written. Employing a structure that deftly mirrors that of the novel, My Life in Middlemarch takes the themes of Eliot's masterpiece--the complexity of love, the meaning of marriage, the foundations of morality, and the drama of aspiration and failure--and brings them into our world. Offering both a fascinating reading of Eliot's biography and an exploration of the way aspects of Mead's life uncannily echo that of Eliot herself, My Life in Middlemarch is for every ardent lover of literature who cares about why we read books, and how they read us. From the Hardcover edition.

This leading-edge study focuses on the latest techniques in analysing and representing the complex, multi-layered data now available to geographers studying urban zones and their populations. The volume tracks the successful results of the SPANGEO Project, which was set up in 2005 to standardize, and share, the syncretic, multinational mapping techniques already developed by geographers and computer scientists. SPANGEO sought new and responsive ways of visualising urban geographical and social data that reflected the fine-grained detail of the inputs. It allowed for visual representation of the large and complex networks and flows which are such an integral feature of the dynamism of urban geography. SPANGEO developed through the 'visual analytics loop' in which

geographers collaborated with computer scientists by feeding data into the design of visualisations that in turn spawned the urge to incorporate more varied data into the visualisation. This volume covers all the relevant aspects, from conceptual principles to the tools of network analysis and the actual results flowing from their deployment. Detailed case studies set out in this volume include spatial multi-level analyses of flows in airports and sea ports, as well as the fascinating scientific networks in European cities. The volume shows how the primary concern of geography—the interaction of society with physical space—has been revived by the complexities of new cartographical and statistical methodologies, which allow for highly detailed mapping and far more powerful computer analysis of spatial relationships.

'dated information' was deleted from the contents. This 'dated information' is considered valuable today by those enthusiasts interested in vintage motorcycle tuning and modification. Consequently, this makes the revised 4th UK publication the most complete and desirable edition. Therefore, it is our pleasure to offer this reprint of the Floyd Clymer 'Revised 4th UK Edition or Second American Edition of 'Tuning for Speed' to motorcycle enthusiasts worldwide. 'Tuning for Speed' was originally published in 1948 and continuously reprinted and updated in order to keep pace with the constantly evolving range of British motorcycles and engines. While the primary focus of this publication is on 1965 and prior British motorcycles, the theory and engineering it contains is still applicable to the current crop of high revving imports. 'Tuning for Speed' is considered by many knowledgeable motorcycle enthusiasts to be one of the best books ever written on how to improve, modify and fine tune a motorcycle engine and it is often referred to as one of the 'top 10' classic motorcycle books. The Floyd Clymer association with this publication dates back to the early 1960's when he purchased the United States Publishing rights for 'Tuning for Speed' from Temple Press in the UK and, in 1967, Clymer published the 1st American edition of that title. However, by 1967, the Clymer publication had been preceded by 8 printings of the UK edition and was incorrectly identified by Clymer as a 9th edition.
