Porth's Essentials of Pathophysiology

Corresponding to the chapters in McCuistion's Pharmacology: A Patient-Centered Nursing Process Approach, 9th Edition, this hands-on study guide offers engaging activities to help you review and remember essential nursing pharmacology. Exercises include study questions, case studies, and NCLEX® Examination-style review questions. This new edition also features additional alternate item format questions including multiple response, fill-in-the-blank calculations, and ordered response questions. It's an essential tool in helping you apply your knowledge of pharmacology to clinical practice, develop pharmacology-related clinical reasoning skills, and master safe drug administration. Detailed case studies enhance users' understanding of nursing responsibilities in therapeutic pharmacology. Drug calculations chapter follows the outline of the main-text chapter to help users test their knowledge and skill in drug dosage calculation. Focus on safety includes a special icon that calls attention to questions related to safe patient care. Sample drug labels have been updated using the new drug labels from the main text. Answers for all exercises are provided at the back of the book to facilitate self-study. Rationales are also included for all application-level questions and case study questions. NEW! Updated content reflects the latest content that is in the textbook. NEW! Expanded NCLEX focus features additional alternate item format NCLEX-style questions in addition to the existing application-level and alternate-item questions.

Pharmacology

This handbook provides detailed coverage of drug classification in a unique, easy-access format. Over 90 drug prototypes are found on the left-hand pages and offer complete pharmacologic information. These prototypes are correlated with nursing process material located on the right-hand pages.

Comprehensive drug tables contain generic and brand drug names; pregnancy categories; common routes and dosages; contraindications and drug, food and laboratory test interactions; pharmacokinetics and pharmacodynamics; therapeutic effects/uses and modes of action; protein binding capacity; half life; onset, peak and duration of drug action; and side effects/adverse reactions.

Pharmacology

Pharmacology Online is a customizable hybrid online course, featuring user-friendly, ready-to-use modules and a flexible library of online assets. Organized by unit to match Pharmacology: A Nursing Process Approach, 7th Edition, this course includes interactive case studies that immerse you in true-to-life scenarios and challenge you to make critical choices in patient care and teaching. Self-study modules covering basic principles of pharmacology, drug calculation review, and key drug classes feature animations and quizzes,

interactive learning activities for each unit, NCLEX® examination-style practice quizzes, electronic flash cards, and care planning activities. Plus, unique "Roadside Assistance" video clips use humor and analogy to bring difficult concepts to life. When used together, these engaging online study modules and interactive assets promote "learning by doing" and make it fun to learn nursing pharmacology. 21 self-study modules - including 6 new to this edition - cover both basic principles of pharmacology and key disorders and drug classes using illustrations, animations, integrated learning activities, and dynamic hyperlinks. Case studies with accompanying quizzes use true-to-life clinical scenarios to help you "learn by doing" in the safety of a virtual clinical setting. NCLEX examination-style practice quizzes for each unit offer valuable review and test preparation with 10 to 15 self-scoring questions and rationales. Interactive, game-like learning activities make it fun to test your knowledge of critical drug content. A collection of 16 unique "Roadside Assistance" video clips feature nationally known pharmacologist/speaker Alan P. Agins, PhD, who presents core pharmacology concepts with humor and analogy. Electronic flash cards provide a quick and easy way to memorize information about major drugs, drug classes, and pharmacologic principles. Care planning activities present brief case studies along with care plan templates that challenge you to use your pharmacology knowledge to plan patient care. Discussion questions facilitate virtual classroom discussions that are critical to learning in an online environment. Animations visually demonstrate and clarify complex concepts. An integrated drug

handbook serves as a convenient reference and adds to the simulated, true-to-life clinical environment. An audio glossary presents both a definition and an audio pronunciation clip for approximately 1,400 terms and drug names. New organization strengthens the connection between the online course and the textbook by combining corresponding self-study modules, videos, and animations into folders that match up with each textbook unit. Dynamic new self-study modules go beyond basic pharmacologic principles to help you better understand key drug information related to areas such as HIV/AIDS, asthma, pain, peptic ulcer disease, antihypertensives, and antilipemic drugs.

Pharmacology + Study Guide

Get the pharmacology guidance proven to help aspiring nurses succeed on the NCLEX and later as a professional nurse. Using a streamlined prototype approach, an emphasis on nursing care, plus a wealth of other trademark features, *Pharmacology: A Patient-Centered Nursing Process Approach, 10th Edition* makes it easy for you to really understand pharmacology. Prototype drug charts summarize the need-to-know information about key drugs, including dosage, side effects, interactions, and more. Images of current drug package labels reinforce your understanding of text content using relevant, true-to-life learning. Bulleted nursing process summaries relate nursing care to drug therapy in addition to highlighting patient teaching, patient safety, and relevant cultural content. Finally, the unique and thorough drug calculations section features math review as well as step-by-step instructions for drug calculations using the four general methods of dosage calculation. All in all this text has all the tools you need to better understand the complicated subject of pharmacology. **UNIQUE!** Prototype drug charts provide easy access to key information for representative drugs, including dosages,

contraindications, drug-lab-food interactions, pharmacokinetics, and more. UNIQUE! Extensive chapter on drug calculations presents six methods of dosage calculation, providing a helpful review and supplement to a dosage calculations textbook. UNIQUE! Nursing process summaries highlight important nursing considerations within the framework of the nursing process. Consistent RN-standard chapter pedagogy includes: online learning resources on the companion Evolve website, objectives, and outline. Critical thinking case studies challenge you to apply your knowledge and analytical skills to realistic patient scenarios. Answer guidelines are provided on the Evolve website. Application-level NCLEX study questions include at least one alternate-format question included per chapter. Chapter on safety and quality discusses medication errors, specific nursing measures to promote safety, National Patient Safety Goals, and many other safety issues and concerns. Prioritization coverage throughout the text helps you learn to prioritize nursing care and differentiate need-to-know from nice-to-know content. NEW! Thoroughly updated drug content reflects the very latest FDA drug approvals, withdrawals, and therapeutic uses, as well as corresponding updated nursing content. NEW! New nursing concepts have been added to the nursing processes to further support conceptual learning and higher-level thinking. NEW! New chapter on pharmacogenetics details how a patient's genetic makeup may affect his or her response to drugs. NEW! Additional student review questions have been added to thoroughly prepare you for the growing pharmacology coverage on the NCLEX Exam. NEW! Updated antihypertensive guidelines

This Canadian text covers the ratio and proportion, formula, and dimensional analysis methods offering a step-by-step approach to the calculation and administration of drug dosages. With over 2,000 practice problems, Gray Morris focuses on enhancing the learning experience of nursing students at all curricular levels by making content clinically applicable. Calculate with Confidence, First Canadian Edition addresses the increasing responsibility of the nurse in medication administration, prioritizes patient safety, and reflects the current scope of practice. Tips for Clinical Practice boxes call attention to information critical to math calculation and patient safety. Safety Alert boxes highlight issues that may lead to medication errors and empower you to identify actions that must be taken to avoid calculation errors Chapter review problems test all major topics presented in the chapter. Basic math post-test allows you to assess and evaluate your understanding of basic math material covered in Unit 1, directing you to review chapters if you miss any of these test questions. Basic

Calculate with Confidence

The fully revised and updated edition of this essential pharmacology textbook presents pharmacologic principles in an accessible, full-color format. Featuring Prototype Drug Charts, Nursing Process Charts, and an extensive math/dosage calculations section, this fourth edition includes updated content throughout, including 75 new full-color drug labels. It also includes six new chapters, new Herb Alert boxes, and an expanded ancillary package. Nursing Process Charts relate nursing care to drug therapy. For each step of the nursing process, concise bulleted points outline the plan of care in relation to treatment for selected drug prototypes. A drug calculations chapter, with an 85-page review of dosage calculations, covers a basic math review, all four methods of calculating dosages, and dosage calculations in various settings and for different routes of administration. A comprehensive guide to medication administration addresses all routes of administration in various settings. Unit openers for drug therapy chapters include illustrated

anatomy and physiology overviews and provide a foundation for understanding how each drug works in that body system. Nearly 100 Prototype Drug Charts are included for selected prototype drugs. Each chart lists Drug Class, Dosage, Contraindications, Drug-Lab-Food Interactions, Pharmacokinetics, Pharmacodynamics, Therapeutic Effects/Uses, and Adverse Reactions. Client Teaching sections in each Nursing Process Chart provide client-oriented instructions. Cultural Considerations are covered in a separate chapter and, where appropriate, culturally sensitive client teaching is included in the Nursing Process Charts. Critical Thinking in Action boxes present a clinical scenario and questions for analysis and critical thinking. Study questions appear at the end of every chapter. Includes 75 new full-color drug labels to familiarize students with new medications used in practice. Features an expanded emphasis on herbal therapies, including new Herb Alert boxes and herbal interaction icons throughout the drug families chapters. Coverage of dimensional analysis has been added to the chapter on Medication and Calculations. Features six new chapters: Pediatric Pharmacology, Geriatric Pharmacology, Antipsychotics and Anxiolytics, Antidepressants and Mood Stabilizers, Drugs for the Female Reproductive Cycle I: Pregnancy and Preterm Labor, and Drugs for the Female Reproductive Cycle II: Labor and Delivery. Each method of dosage calculation is consistently highlighted with a distinctive color for easy reference and identification.
