Closure is a very quiet place in our hearts and minds where we sometimes search for peace and finality. We often seek closure when tragedy rips at the very core of our heart, forever devastating our lives and the precious lives of our family and friends. We must realize that achieving closure is ours and only ours. It is not in truth the property of the agony that we experience. It is that innate pain that comes from very deep inside us and if we let it, it will surely consume us. Closure is in our heart of hearts and our intelligible understanding of what weve had to endure and why. Please remember, it is not what happens to us, but how we construe what happens to us that will initially determine our emotions, our behaviors, and ultimately our mental state of mind. Nevertheless, if the faith within is not unyielding, sadly most will spend their entire fractured lives in search of it. From my heart to yours, B.R. McCoy

Living in a real English castle sounds so enchanting and magical, but for Polly Brown, a well-meaning yet often misunderstood young orphan girl, the cruel reality of life behind these castle walls is anything but, as she spends her days in misery under the beady eyes of the Scumberrys, her cruel guardians.

Working for Professor Sam Gervis was difficult enough, even if you weren't falling in love with him which Polly was. Luckily she was realistic about the situation. Sam was engaged to the lovely Deirdre. And besides, he would never look twice at anyone as quiet and mousy as Polly. So she decided, sensibly, to get away and take up a new career nursing children. But she soon discovered that Sam was not an easy man to escape!

Polly Deacon Mysteries 4-Book Bundle

TEACHING MATH TO MADDUX is the tale of a relationship that begins when Maddox, a young man badly in need of mathematical help, encounters Polly, a young woman with precisely the sort of talent Maddox needs. Over the course of their relationship, Polly teaches Maddox to solve mathematical problems he had never been able to solve before. With each chapter, Maddox is raised (as is the reader) to a higher level of mathematical understanding. As one might expect, the story has a very happy aftermath.

How many times have you become distracted in class? I'm sure that everyone has at least one horror story about their daydreams becoming their nightmare. Where Has Polly Gone? is about an ostrich named Netta that has a hard time paying attention in school. On the last day of school, a diversion outside causes Netta to miss the entire Math lesson on polygons. Netta becomes so engrossed with the distraction that she falls out of her chair and her glasses break into tiny polygons! Mrs. Heed, the teacher, calls on her to answer the question on polygons, but she cannot read the board, and she is extremely confused because she wasn't paying attention! In all of the chaos, Mrs. Heed's question, "Where is the Polygon?" becomes a big misunderstanding and Netta assumes that Polly is gone. Netta spends her summer vacation traveling all over the world looking for Polly. Each place that Netta visits has an abundance of polygons, starting with triangles and ending with decadrons. However, Netta doesn't realize that polygons are all around her!
