James - Leader Guide

The definitive story of one of the greatest dynasties in baseball history, Joe Torre's New York Yankees. When Joe Torre took over as manager of the Yankees in 1996, they had not won a World Series title in eighteen years. In that time seventeen others had tried to take the helm of America's most famous baseball team. Each one was fired by George Steinbrenner. After twelve triumphant seasons—with twelve straight playoff appearances, six pennants, and four World Series titles—Torre left the Yankees as the most beloved manager in baseball. But dealing with players like Jason Giambi, A-Rod, Derek Jeter, Mariano Rivera, Roger Clemens, and Randy Johnson is what managing is all about. Here, for the first time, Joe Torre and Tom Verducci take readers inside the dugout, the clubhouse, and the front office, showing what it took to keep the Yankees on top of the baseball world. From the Trade Paperback edition.

Television Histories

Consuming Innocence- Popular Culture and Our Children is an engaging and thought-provoking look at the effects of popular culture on children, parenting and family life. It is down to earth, confronting and accessible without sacrificing intelligent argument, analysis and discussion. Underneath the conversational tone and common-sense advice is serious and comprehensive research. This timely book explores the complex relationship kids - from tots and tweens to teens - have with popular culture. Without blaming children or parents, Consuming Innocence considers the role of celebrities, fads, technology, fashion, school, the media and, most importantly, parents, and the part they all play in creating children's ideas of themselves. Chapters focus on specific elements of global popular culture, from the corporations that target kids and promote sexuality, to toys, TV shows like The Simpsons, film, celebrities, internet sites, children's fashion and parenting practices. It looks realistically at what has been described as the crisis of stolen childhoods, but with empathy, understanding and humour. Consuming Innocence shows how parents, grandparents, teachers and other concerned adults can educate themselves about popular culture and the messages it gives. By doing this, we can pro-actively inform children and teenagers about popular culture, and support and protect them when necessary.

The Rise & Fall of ECW

Explores the lives of those who shed their ethnic identity in pursuit of the American dream with a different character in each chapter, including Hector, a day laborer who witnesses a murder, and Felicia, who survives a drive-by shooting.

The Business of Sports

These collected papers are critical reflections about the rapid digitalization of discourse and culture. This disruptive change in communicative interaction has swept rapidly through major universities, nation states, learned disciplines, leading businesses, and government agencies during the past decade. To commemorate the tenth anniversary of the Center for Digital Discourse and Culture (CDDC) at Virginia Tech, which has been a pioneering leader for many of these changes in university settings, the contributors to this volume examine the transformative implications of digitalizing discourse and culture inside and outside of the academic arena. These technologies of digitalization have created new communities of users, which are highly engaged with their new communicative possibilities, informational content, and discursive forms. Few have asked what these changes will mean, and many of the most important voices engaged in debates about this critical transformation are gathered here in this volume. Each author in his or her own way considers what accepting digital discourse and informational culture now means for contemporary economies, governments, and societies.

Barr Group's Embedded C Coding Standard was developed to help firmware engineers minimize defects in embedded systems. Unlike the majority of coding standards, this standard focuses on practical rules that keep bugs out - including techniques designed to improve the maintainability and portability of embedded software. The rules in this coding standard include a set of guiding principles, as well as specific naming conventions and other rules for the use of data types, functions, preprocessor macros, variables, and other C language constructs. Individual rules that have been demonstrated to reduce or eliminate certain types of defects are highlighted. The BARR-C standard is distinct from, yet compatible with, the MISRA C Guidelines for Use of the C Language in Critical Systems. Programmers can easily combine rules from the two standards as needed.

"Is it working? Your belief system, that is. Is it really working? God's intention all along has been for the believer's life to work. From divine perspective toward terrestrial turf, God meant for his children to succeed. . . Are our Christian lives successful? Are they achieving and experiencing what Scripture said they would? In a recent sermon my son-in-law preached, Curt told us the only way we were going to impact the world and the next generation is to prove that our faith in

Christ is real and that it works. For countless Christians I'm convinced it's real. My concern is whether or not we have the fruit to suggest it works."—Beth Moore; Believing God

It's a tough job separating truth from urban legend, but the MythBusters are here to serve. For example, is it true that if you step in quicksand , you'll be sucked down to your death? Only two men would be inventive - and adventurous - enough to try to find out: Adam Savage and Jamie Hyneman, the MythBusters. Each week, hosts Savage and Hyneman, both special effects experts, use modern science to put another three urban legends to the test on their popular TV show. In this book, you'll learn how they either "busted" or confirmed fifteen myths on their show, often with spectacular results. Here are just some of the urban legends in this book: Did a Ming Dynasty astronaut launch himself into space with a rocket? Can a swallowed octopus egg grow to full size inside a person's stomach? Is the daddy longlegs the world's most venomous spider? Will a sinking ship suck you down? How many balloons are needed to lift a small child off the ground? Does a duck's quack echo? Mythbusters: Don't Try This at Home! gets to the bottom of these urban legends and more, and it lets you do your own mythbusting with fun experiments you can do safely at home.

Consuming Innocence

From Ken Burns's documentaries to historical dramas such as *Roots*, from A&E's Biography series to CNN, television has become the primary source for historical information for tens of millions of Americans today. Why has television become such a respected authority? What falsehoods enter our collective memory as truths? How is one to know what is real and what is imagined -- or ignored -- by producers, directors, or writers? Gary Edgerton and Peter Rollins have collected a group of essays that answer these and many other questions. The contributors examine the full spectrum of historical genres, but also institutions such as the History Channel and production histories of such series as *The Jack Benny Show*, which ran for fifteen years. The authors explore the tensions between popular history and professional history, and the tendency of some academics to declare the past "off limits" to nonscholars. Several of them point to the tendency for television histories to embed current concerns and priorities within the past, as in such popular shows as *Quantum Leap* and *Dr. Quinn, Medicine Woman*. The result is an insightful portrayal of the power television possesses to influence our culture.

Girlhood on Disney Channel

On an island off the coast of Maine, a man is found dead. There's no identification on the body. Only the dogged work of a pair of local newspapermen and a graduate student in forensics turns up any clues. But that's just the beginning of the mystery. Because the more they learn about the man and the baffling circumstances of his death, the less they understand. Was it an impossible crime?

Or something stranger still? No one but Stephen King could tell this story about the darkness at the heart of the unknown and our compulsion to investigate the unexplained. With echoes of Dashiell Hammett's *The Maltese Falcon* and the work of Graham Greene, one of the world's great storytellers presents a surprising tale that explores the nature of mystery itself

Hollywood in the Information Age

“A Hollywood hit....Taut, inimitable prose and characters who could have only sprung from the mind of Elmore Leonard.” —Detroit News
The Chicago Tribune has dubbed Elmore Leonard, “the coolest, hottest writer in America.” In the same league as the legendary great ones—John D. MacDonald, Dashiell Hammett, James M. Cain—the “King Daddy of crime writers” (Seattle Times) demonstrates his remarkable mastery with *Get Shorty*, one of the most adored of his forty-plus novels. The basis of the hit movie starring John Travolta and Danny DeVito, *Get Shorty* chronicles the over-the-top, sometimes violent Hollywood misadventures of a Florida mob loan shark who chases a deadbeat client all the way to Tinseltown and decides to stick around and make movies. *Get Shorty*'s shylock protagonist, Chili Palmer, is a truly inspired creation—as memorable as another unforgettable Leonard hero, U.S. Marshal Raylan Givens of the hit TV series *Justified*—and readers will relish his moves and countermoves in this electrifying, funny, bullet train-paced winner from “the greatest crime writer of our time, perhaps ever!” (New York Times Book Review)
