This volume features the complete text of the material presented at the Twenty-Fourth Annual Conference of the Cognitive Science Society. As in previous years, the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals, presenting a multifaceted view of cognitive science. The volume includes all papers, posters, and summaries of symposia presented at this leading conference that brings cognitive scientists together. The 2002 meeting dealt with issues of representing and modeling cognitive processes as they appeal to scholars in all subdisciplines that comprise cognitive science: psychology, computer science, neuroscience, linguistics, and philosophy.

And he detests the color yellow. This improbable story of Christopher's quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in recent years.

Math is universal, but it's also the least understood and most undervalued subject taught in school. *Two Trains Leave Paris: Number Problems for Word People* seeks to offer readers an opportunity to experience math like never before. You must use the Pythagorean Theorem to figure out how far apart two ex-lovers are when they simultaneously realize that they cannot live without each other. You must use addition (and logic) to explore the ridiculous (and patriarchal!) wage gap. Throughout six math-themed chapters, readers will follow a series of characters as they apply for jobs, fall in love, get abducted by aliens, and experience many of life's other big and small moments, all of which are dictated by—you guessed it—math! With the help of humor, mathematical history, and how-to-solve sections, *Two Trains Leave Paris* asks readers to help its characters find growth in the most unexpected of places: word problems. And the answers are, of course, in the back.

The first new casebook in more than ten years, it contains twenty current cases that present real classroom dilemmas English teachers are likely to encounter in today's classroom. The casebook is designed to help new and experienced English teachers become thoughtful and reflective practitioners who are well equipped to deal with complex and current problems. A grades and issues matrix identifies each case according to middle or high school grade level and indicates the issue(s) on which they focus. Twenty current cases represent real teaching dilemmas with no easy solutions so teachers can benefit from thinking through the dilemmas and developing possible solutions and consequences with other teachers. Focus questions and discussion questions accompany each case. For new and experienced English teachers.

If someone were to ask Lance Austin to put into words, his feelings and his beliefs about love, he would be hard pressed to provide a short definitive answer. Ask him to show a particular woman that he loves her and you would be wasting your time. He will have already strapped himself into his 100 M.P.H., high flying roller coaster and taken off into his over-the-top expressions of true endearment for whomever he has chosen as his mate. When Lance takes his love journey onto the internet for the first time in his life, he does find love; but will it last? Will the life changing experience that Melanie Powell brings to the table, be for the better in their lives or for the worst? The sexual experiences they share are extraordinary and often. The poems and love letters he writes to her are excessive. They often exchange extravagant gifts and they experience many new venues together; and oh, lets not forget the arguing and the fighting that comes gift wrapped with all of the above. Will this potentially lethal combination prove to be their downfall in an attempt at everlasting love? In between all of that, Lance manages to meet other cyber space hopefuls online; though his heart is still with Melanie. There are a variety of reasons why he shouldnt be with any of these women but he allows himself to entertain the thought of it anyway. He meets some of them in person at least once, finding himself strapped into another kind of roller coaster; one that is mentally challenging, humorous, painfully dramatic, yet ultimately disappointing. Lance begins to reflect upon his own internal qualities and only time will tell in which direction his emotions will take him from a moral stand point. When Lance turns to his family and friends for a certain sense of solitude, most of them bring their own emotional problems to light, in ways that surprise even Lance. One platonic friendship he hopes to find some level of comfort in, that of Sherry Anderson starts to go into its own version of a mental tail-spin for him. He is curious to say the least, about Sherrys overall intentions and if theres more to their friendship than meets the eye. To measure the emotional value of this depiction of nearly five years of Lance Austins life is impossible to do. This journey for him is about life itself with the technological trend of the internet dating craze as the main back drop. Where will Lance wind up morally, mentally, spiritually, after meeting over a dozen of these cyber space women? Find out when you read Internet Dating!!
