Origami Sculptures

An unassuming book, still one of those which grip the reader from beginning to end. When the author started to write his daily impressions and adventures, it was to keep in touch with his people, to quiet those who feared for his safety every moment, and at the same time to give them a clear idea of his life. Without boasting, modestly and naturally, he describes the adventures of an aviator in the great World War.

The special problems and opportunities presented by island tourism are major new areas of interest for both tourism

academics and professionals, prompting much discussion and debate. This is the first book to focus on how management and organisational issues affect small islands and their tourism industries, and to examine the factors which affect tourism on small islands. International contributors, including practitioners and researchers examine this important topic and discuss a diversity of inter-related themes, including policy areas; public/private sector planning partnerships; product development; marketing; human resource management; and sustainability. These general issues are complemented with case studies which illustrate the application of island management principles. For undergraduates, graduates and professionals in the tourism field, this book is an essential guide to island tourism management.

This collection of essays explores concepts present in literatures in French that, since the 2007 manifesto, more and more critics, suspicious of the term Francophonie, now prefer to designate as littérature-monde (world literature). The book shows how the three movements of antillanité, créolité and littérature-monde each in their own way break with the past and distance themselves from the hexagonal centre. The critics in this collection show how writers seek to represent an authentic view of their history, culture, identities, reality and diversities. According to many of the contributors, creolization and littérature-monde offer new perspectives and possibly a new genre of literature. Ces essais explorent les concepts présents dans la littérature en français, que depuis le manifeste de 2007, de plus en plus de critiques, suspicieux du terme francophonie préfèrent désigner sous le terme de littérature-monde. Ce livre montre comment les trois mouvements antillanité, créolité et littérature-monde, bien qu'ils cherchent chacun à présenter une rupture, offrent aussi un but similaire de distanciation avec le centre hexagonal. Les critiques de ce recueil démontrent comment les écrivains cherchent à représenter une vision authentique de leur histoire, leur culture, leurs identités, leur réalité et leur diversité. Selon de nombreux contributeurs à ce recueil, la créolisation ou la littérature-monde offrent de nouvelles perspectives et la possibilité d'un nouveau genre de littérature.

Community Organizing and Development

This case study of a politically reformed, middle-sized Midwestern city provides a model of fiscal stress that contrasts

sharply with that of America's vast metropolitan centers. Dr. Rubin examines the interaction of social, political, and economic causes of the city's predicament. She then goes on to analyze the specific factors that solved the city's problems over a six-year period. Finally, she offers a self-correcting mechanism that would allow a city to save itself from financial trouble without direct state or federal assistance. This study suggests that local political factors were even more important than national factors in contributing to the city's fiscal stress. It also brings into question the theory that generosity to the poor creates urban fiscal stress and that giving less to the poor will solve urban financial problems.

"The year is 1095. The most prominent leaders of the Christian world have assembled in a meadow in France near Clermont. Pope Urban appeals for the liberation of Jerusalem and cries out Deus Lo Volt! God Wills It! The cry is taken up, echoes forth and is carried on. Wave upon wave of Christian pilgrims rush to assault the growing power of Muslims in the Holy Land and will do so for the next two hundred years. Most able men become soldiers of the Cross, and when a man is prevented by old age or ill health, he sends his son. Women, too, go to fight alongside the men. It is a time of great adventure, of great exploration and cultural change. Uniting Christian Europe in a common cause, the crusades defined forever the spirit of the West.

The signature creation of cartoonist Roger Langridge, Fred the Clown is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}

Pragmatic Unit Testing in C# with NUnit

Written by Stu Maschwitz, co-founder of the Orphanage (the legendary guerrilla visual effects studio responsible for amazing and award-winning effects in such movies as Sin City, The Day After Tomorrow, and Harry Potter and the Goblet of Fire), this book is a must-have for all those budding filmmakers and students who want to produce action movies with visual effects but don't have Hollywood budgets. The Orphanage was created by three twenty-something visual effects veterans who wanted to make their own feature films and discovered they could do this by utilizing home computers, off the shelf software, and approaching things artistically. This guide details exactly how to do this: from planning and selecting the necessary cameras, software, and equipment, to creating specific special effects (including gunfire, Kung Fu fighting, car chases, dismemberment, and more) to editing and mixing sound and music. Its mantra is that the best, low-budget action moviemakers must visualize the end product first in order to reverse-engineer the least expensive way to get there. Readers will learn how to integrate visual effects into every aspect of filmmaking--before filming, during filming and with "in camera" shots, and with computers in postproduction. Throughout the book, the author makes specific references to and uses popular action movies (both low and big-budget) as detailed examples--including El Mariachi, La Femme Nikita, Die Hard, and Terminator 2. "A gleeful, poetic book...Like the best natural histories, Dirt is a kind of prayer." —Los Angeles Times Book Review "You are about to read a lot about dirt, which no one knows very much about." So begins the cult classic that brings mystery and

magic to "that stuff that won't come off your collar." John Adams, Thomas Jefferson, Saint Phocas, Darwin, and Virgil parade through this thought-provoking work, taking their place next to the dung beetle, the compost heap, dowsing, historical farming, and the microscopic biota that till the soil. Whether William Bryant Logan is traversing the far reaches of the cosmos or plowing through our planet's crust, his delightful, elegant, and surprisingly soulful meditations greatly enrich our concept of "dirt," that substance from which we all arise and to which we all must return.

There are investment aspects of the North American Free Trade Agreement (NAFTA) which considerably enhance the opportunities for foreign investment among the signatories, while at the same time improving the security of such investment. NAFTA reflects the Parties' recognition that liberalization of host country investment restrictions is as important as the elimination of trade barriers. With the assistance of such high caliber contributors as Roberto Mayorga, Kent S. Foster, Preston Brown, and Dr. Jorge Witker, the book analyses both the advantages and disadvantages of this policy upon the investment climate within the countries of the various signatories. This book is the second volume in Kluwer's NAFTA Law and Policy Series, publishing high-quality studies on different aspects of NAFTA, including legal analysis and commentary on the Agreement. Among the numerous areas that are to be covered in the series are topics as diverse as agriculture, dispute settlement, environment, intellectual property rights, investment, and labour.

At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. In this beautifully written and deeply researched study, Hannah Frank provides an original way to understand American animated cartoons from the Golden Age of animation (1920-1960). In the pre-digital age of the twentieth century, the making of cartoons was mechanized and standardized: thousands of drawings were inked and painted onto individual transparent celluloid sheets (called "cels") and then photographed in succession, a labor-intensive process that was divided across scores of artists and technicians. In order to see the art, labor, and technology of cel animation, Frank slows cartoons down to look frame by frame, finding hitherto unseen aspects of the animated image. What emerges is both a methodology and a highly original account of an art formed on the assembly line.
