Watercolors by Hubert Shuptrine and text by James Dickey present the South as Jericho, "the first city of the Promised Land: the city that fell to Joshua."

Super-completely and Totally the Messiest

In Texas and throughout the South, myriad barbecue joints claim the title of "best barbecue." Many barbecue enthusiasts would nearly fight to the death to defend their favorite, and the Salt Lick is certainly a contender. But Salt Lick owner Scott Roberts doesn't care about that. He's more interested in the smiles on his customers' faces as they leave the restaurant. With more than 600,000 customers served each year, he may be onto something. That's because Roberts is building on the foundation his family laid down more than 130 years ago, as his great-grandparents made

their long journey to Texas. On the trail, they prepared food and cooked meat in ways that preserved it. Roberts keeps those techniques because they are simple and proven. His great-grandparents settled in Driftwood in the 1870s, and his grandparents farmed the land and were sustained by its bounty. They helped raise Roberts and instilled in him a love of the rural way of life. This is not a book just about Salt Lick barbecue. It's about how the barbecue came to be: a story of respect for the land, its history, and the family that planted its roots in Driftwood and cultivated a well-deserved reputation.

Zandile the Resolute

This text is the product of several years' effort to develop a course to fill a specific educational gap. It is our belief that computer science students should know how a computer works, particularly in light of rapidly changing technologies. The text was designed for computer science students who have a calculus background but have not necessarily taken prior physics courses. However, it is clearly not limited to these students. Anyone who has had first-year physics can start with Chapter 17. This includes all science and engineering students who would like a survey course of the ideas, theories, and experiments that made our modern electronics age possible. This textbook is meant to be used in a two-semester sequence. Chapters 1 through 16 can be covered during the first semester, and Chapters 17 through 28 in the second semester. At Queens College, where preliminary drafts have been used, the material is presented in three lecture periods (50 minutes each) and one recitation period per week, 15 weeks per semester. The lecture and recitation are complemented by a two-hour laboratory period per week for the first semester and a two-hour laboratory period biweekly for the second semester.

Lucille's Diary of Awesomeness 2020

New York, late 1840s, and in the wild, noisy, brash and beautiful circus of Silas P. Swift a shadowy, mesmeric woman entrances crowds because she can unlock the secrets of troubled minds. Above them all her daughter sweeps and soars: acrobat and tightrope-walker. People cannot take their eyes from the mysterious woman in the Big Top who can help so many others - but she cannot unlock dark, literally unspeakable, memories of her own. In London memories fester in the mind of an old and venomous duke of the realm. He plots, with an unscrupulous lawyer (and a huge financial reward) against the mother and the daughter: to kill one, and to abduct the other and bring her across the Atlantic to him: She is mine. The actress and mesmerist Cordelia Preston and her daughter Gwenlliam live with their unusual family in the exciting new city among exciting new ideas: the telegraph, the daguerrotype, anaesthesia, table-tapping. And among the dangerous street-gangs of New York also, whose raw violence meets Cordelia and Gwenlliam and those that they love, with unexpected results.

A Clenched Fist

From ancient times, society has considered jewels as a sign of wealth and power, ornaments aimed at arousing attention, admiration and desire. This viewpoint was Claude Mazloum's criterion for choosing the variegated creations of some of the top international jewel artists included in this volume. The jewellery pictured here carries messages now demure; now forward, but always of great beauty and utter artistic mastery. There are chapters on jewels and their abstract, representational and even philosophic relationship to the world of eroticism.
