"What is a person? Surprisingly little attention is given to this question in psychology. For much of the past century, psychology has tended to focus on the systematic study of processes rather than on the persons who enact and embody them. In contrast to the reductionist picture of much mainstream theorizing, which construes persons as their mental lives, behaviours or neurophysiological particulars, The Psychology of Personhood presents persons as irreducibly embodied and socially situated beings. Placing the study of persons at the centre of psychology, this book presents novel insights on the typical, everyday actions and experiences of persons in relation to each other and to the broader society and culture. Leading scholars from diverse academic disciplines paint an integrative portrait of the psychological person within evolutionary, historical, cultural, developmental and everyday contexts"--

Named One of Riffle's Ten Best Haunted House Books of All Time Built at the turn of the twentieth century by one of the richest and most powerful men in the world tucked away in the pristine Pocono Mountains, Summer Place, a retreat for the rich and famous, seems the very essence of charm and beauty, "a scene borrowed from a wondrous fairytale of gingerbread houses, bright forests, and glowing, sunny meadows." But behind the yellow and white trimmed exterior lurks an evil, waiting to devour the unwary Seven years ago, Professor Gabriel Kennedy's investigation into paranormal activity at Summer Place ended in tragedy, and destroyed his career. Now, Kelly Delaphoy, the ambitious producer of a top-rated ghost-hunting television series, is determined to make Summer Place the centerpiece of an epic live broadcast on Halloween night. To ensure success, she needs help from the one man who has come face-to-face with the evil that dwells in Summer Place, a man

still haunted by the ghosts of his own failure. Disgraced and alienated from the academic community, Kennedy wants nothing to do with the event. But Summer Place has other plans As Summer Place grows stronger, Kennedy, along with the paranormal ghost hunting team, The Supernaturals, sets out to confront and if possible, destroy the evil presence dwelling there.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals,

recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

As a leading Confederate general, Braxton Bragg (1817–1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army—including Bragg's superiors, his fellow generals, and his subordinates—reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure

in Civil War history.

Among the most important contributions the National Park Service has made since its founding in 1916 has been the development of extraordinary museum technology and administration---national in scope and international in influence. This manual, a distillation of what many persons have learned about the day-to-day operations of museums, is meant to provide curatorial standards and serve as a reference for museum workers everywhere. This book was written by Ralph H. Lewis, an outstanding museum administrator and curator with many years of experience in the National Park Service. It is an outgrowth of an earlier (1941) volume entitled Field Manual for Museums by Ned J. Burns, a work that went out of print during World War II and is, even to this day, in demand by curators and museum managers. In this present manual, Mr. Lewis carries on a tradition of excellence in museum practice that can be traced back to the mid-1930's when Carl P. Russell set the basic pattern for museum work in the national parks. In those early years most park museums could not afford or were too small to engage a full time professional museum staff. Dr. Russell set up centralized laboratories staffed by

curators and preparators and provided the parks with exhibition and preservation expertise from this pool. The ordinary maintenance and operation of the museums were left to the superintendents who managed the parks, and to the archeologists, historians and naturalists who interpreted them.
