The Paleo Solution

Paleo Diet

The idea behind the Paleo, or 'caveman', diet is simple - eat the food we humans were genetically and biologically meant to eat, as our hunter-gatherer ancestors once did, and we can all experience near-effortless weight loss, increased vitality and greatly improved health. But does it really make sense to restrict yourself to the limited range of foods available to our ancestors? Although we share a lot in common with them, we each have our own genes, tastes and health goals. In this groundbreaking book, leading expert Chris Kresser offers his unique solution - a 3-step plan that will fit your body, your lifestyle and your specific health issues. Start by following the basic Paleo plan for 30 days and enjoy a satisfying diet of lean meat, fish, non-starchy vegetables, some fruit, nuts and seeds but avoid grains, dairy, sugar and refined foods. After this 30-day plan, Chris helps you re-introduce certain foods in moderation to find out what agrees with you and what doesn't. So what are you waiting for? You can enjoy life more, look slimmer and feel more vital. And because Chris advocates an 80/20 approach - we all have to live in the real world after all - you can still enjoy your favourite treats from time to time. In addition to dietary advice, the plan also includes guidance on fine-tuning your sleep, exercise and response to stress - all crucial elements in living a life that suits our natural design.

Paleo Takes 5 - Or Fewer

“With . . . evidence from recent genetic and anthropological research, [Zuk] offers a dose of paleoreality.”—Erin Wayman, Science News We evolved to eat berries rather than bagels, to live in mud huts rather than condos, to sprint barefoot rather than play football—or did we? Are our bodies and brains truly at odds with modern life? Although it may seem as though we have barely had time to shed our hunter-gatherer legacy, biologist Marlene Zuk reveals that the story is not so simple. Popular theories about how our ancestors lived—and why we should emulate them—are often based on speculation, not scientific evidence. Armed with a razor-sharp wit and brilliant, eye-opening research, Zuk takes us to the cutting edge of biology to show that evolution can work much faster than was previously realized, meaning that we are not biologically the same as our caveman ancestors. Contrary to what the glossy magazines would have us believe, we do not enjoy potato chips because they crunch just like the insects our forebears snacked on. And women don’t go into shoe-shopping frenzies because their prehistoric foremothers gathered resources for their clans. As Zuk compellingly argues, such beliefs incorrectly assume that we’re stuck—finished evolving—and have been for tens of thousands of years. She draws on fascinating evidence that examines everything from adults’ ability to drink milk to the texture of our ear wax to show that we’ve actually never stopped evolving. Our nostalgic visions of an ideal evolutionary past in which we ate, lived, and reproduced as we were “meant to” fail to recognize that we were never perfectly suited to our environment. Evolution is about change, and every organism is full of trade-offs. From debunking the caveman diet to unraveling gender stereotypes, Zuk delivers an engrossing analysis of widespread paleofantasies and the scientific evidence that undermines them, all the while broadening our understanding of our origins and what they can really tell us about our present and our future.

The Paleo Manifesto

It is no secret that the United States is facing an obesity epidemic with the obesity rates continuing to rise year after year. According to the Center for Disease Control, one third of Americans are now obese. It is no longer sufficient to simply point out the health risks of obesity to our patients as the reason to lose weight. Patients are seeking guidance in terms of what specific diet plan to follow and what foods should be eaten. There are thousands of diets on the market with new ones introduced daily. Not all diet plans have proven results, nor will they work for every patient. More importantly, not all diets marketed to the public are safe to follow for an extended timeframe. In fact, research shows us that diet composition is not the key to long term success, but compliance to a calorie deficient diet is the solution. So how does one choose which diet plan to recommend to patients? Finally, a book for clinicians is here to help answer this question. This book provides information to help patients understand several different research proven diets on the market today including: the Atkins diet, the DASH (Dietary Approaches to Stop Hypertension) diet, the I diet, the Mediterranean diet, Paleo Diets, South Beach, Vegetarian diets, Weight Watchers, and the Zone diet. Each diet is carefully and thoroughly reviewed in this book by some of America's top obesity medicine and weight management specialists to provide health practitioners a knowledge of the diet composition, current research evaluating the diet, typical weight loss results, the pros and cons of the diet as well as which patients would most benefit from each diet plan. This book provides the necessary tools for clinicians to feel comfortable discussing several of the more popular and scientifically researched diets with patients. This book offers solid information to advise patients, based on their specific health history, on which diet will afford the greatest chance for success.

Everyday Paleo Family Cookbook

Combining your body's Paleolithic needs with modern nutritional and medical research for complete mind-body wellness • Provides sustainable diet strategies to curb sugar cravings, promote fat burning and weight loss, reduce stress and anxiety, improve sleep and moods, increase energy and immunity, and enhance memory and brain function • Shows how our modern diet leads to weight gain and "diseases of civilization"--such as cancer, osteoporosis, metabolic syndrome, heart disease, and ADD • Explains how diet affects the brain, hormone balance, and the aging process and the crucial role of vitamin D in cancer and disease prevention Examining the healthy lives of our pre-agricultural Paleolithic ancestors and the marked decline in stature, bone density, and dental health and the increase in birth defects, malnutrition, and disease following the implementation of the agricultural lifestyle, Nora Gedgaudas shows how our modern grain- and carbohydrate-heavy low-fat diets are a far cry from the high-fat, moderate-protein hunter-gatherer diets we are genetically programmed for, leading not only to lifelong weight gain but also to cravings, mood disorders, cognitive problems, and "diseases of civilization"--such as cancer, osteoporosis, metabolic syndrome (insulin resistance), heart disease, and mental illness. Applying modern discoveries to the basic hunter-gatherer diet, she culls from vast research in evolutionary physiology, biochemistry, metabolism, nutrition, and chronic and degenerative disease to unveil a holistic lifestyle for true mind-body health and longevity. Revealing the primal origins and physiological basis for a high-fat, moderate-protein, starch-free diet and the importance of adequate omega-3 intake--critical to our brain and nervous system but sorely lacking in most people's diets--she explains the nutritional problems of grains, gluten, soy, dairy, and starchy vegetables; which natural fats promote health and which (such as canola oil) harm it; the crucial role of vitamin D in cancer and disease prevention; the importance of saturated fat and cholesterol; and how diet affects mental health, memory, cognitive function, hormonal balance, and cellular aging. With step-by-step guidelines, recipes, and meal recommendations, this book offers sustainable strategies for a primally based, yet modern approach to diet and exercise to reduce stress and anxiety, lose weight, improve sleep and mood, increase energy and immunity, enhance brain function, save money on groceries, and live longer and happier.

Paleo for Beginners: Essentials to Get Started

A Comprehensive Metabolic & Lifestyle Approach A diagnosis of Alzheimer's disease in 2016 is startlingly similar to a half-century ago. Despite decades of research and millions of dollars invested in uncovering the causes and developing treatments for this devastating illness, progress has been slow, with each new "blockbuster" drug proving to be as big a disappointment as the ones that went before it. Today, an Alzheimer's diagnosis is a death sentence. However, there may be ways to prevent, delay, and possibly even reverse the course of this crippling neurodegenerative disease. In *The Alzheimer's Antidote*, Certified Nutrition Specialist Amy Berger presents a multi-pronged nutrition and lifestyle intervention to combat Alzheimer's disease at its roots. Berger's research shows that Alzheimer's results from a fuel shortage in the brain: As neurons become unable to harness energy from glucose, they atrophy and die, leading to classic symptoms like memory loss and behavioral changes. This is a revolutionary approach—one that has been discussed in the scientific literature for years but has only recently been given credence in clinical settings, thanks to extremely promising studies wherein Alzheimer's patients have experienced complete reversals of the condition. Medical and scientific journals are full of research showing alternate ways to fuel the starving brain, but no one has been bringing this essential information to the people who need it most—until now. In a culture obsessed with miracle medications, the pharmaceutical route for tackling Alzheimer's has been a massive failure. Pills and potions don't address underlying causes, and regarding Alzheimer's, they typically fail to improve even the symptoms. As a metabolic problem, the only effective way to treat Alzheimer's may be a multifaceted approach that fundamentally reprograms energy generation in the brain. The good news is, the secret is as simple as switching to a low-carb, high-fat diet. *The Alzheimer's Antidote* shows us that cognitive decline is not inevitable, but if it does occur, we don't have to sit idly by and wait helplessly while it progresses and worsens. Amy Berger empowers loved ones and caregivers of Alzheimer's sufferers, and offers hope and light against this otherwise unnavigable labyrinth of darkness.

The 30-Day Low-Carb Diet Solution

In The Autoimmune Paleo Cookbook, Mickey Trescott provides a resource for those looking to embark on the Autoimmune Protocol--a version of an ancestral diet that is focused both on removing potential food triggers as well as healing the gut. Research shows there is a clear connection between diet and autoimmune disease, and many, including the author, have used these principles to heal their bodies from these debilitating conditions and their accompanying symptoms. With the information and recipes in this book, you can embark on this process for yourself--without suffering through bland and tasteless "allergen-free" meals. Instead, with all of the incredible food you will be enjoying, you may forget that you are achieving better wellness!

The Paleo Coach

The Paleo Autoimmune Protocol (AIP) is a diet and lifestyle program designed to reduce inflammation, heal digestion, deliver nutrition that supports health, and ultimately reverse autoimmune disease. It's not a cure, but it can make a powerful difference in how you feel. The author knows this first-hand. She uses the AIP to manage rheumatoid arthritis. This book is designed to make the transition to the AIP easier. It contains all of the essential information in a package small enough to throw in your purse or backpack. It's simple enough that even someone with brain fog can understand. And it's written like a conversation between friends.

Free The Animal: Lose Weight & Fat With The Paleo Diet

We're told that if we care about our health—or our planet—eliminating red meat from our diets is crucial. That beef is bad for us and cattle farming is horrible for the environment. But science says otherwise. Beef is framed as the most

environmentally destructive and least healthy of meats. We're often told that the only solution is to reduce or quit red meat entirely. But despite what anti-meat groups, vegan celebrities, and some health experts say, plant-based agriculture is far from a perfect solution. In *Sacred Cow*, registered dietitian Diana Rodgers and former research biochemist and New York Times bestselling author Robb Wolf explore the quandaries we face in raising and eating animals—focusing on the largest (and most maligned) of farmed animals, the cow. Taking a critical look at the assumptions and misinformation about meat, *Sacred Cow* points out the flaws in our current food system and in the proposed “solutions.” Inside, Rodgers and Wolf reveal contrarian but science-based findings, such as: Meat and animal fat are essential for our bodies. A sustainable food system cannot exist without animals. A vegan diet may destroy more life than sustainable cattle farming. Regenerative cattle ranching is one of our best tools at mitigating climate change.
