A single line of code offers a way to understand the cultural context of computing. This book takes a single line of code--the extremely concise BASIC program for the Commodore 64 inscribed in the title--and uses it as a lens through which to consider the phenomenon of creative computing and the way computer programs exist in culture. The authors of this collaboratively written book treat code not as merely functional but as a text--in the case of 10 PRINT, a text that appeared in many different printed sources--that yields a story about its making, its purpose, its assumptions, and more. They consider randomness and regularity in computing and art, the maze in culture, the popular BASIC programming language, and the highly influential Commodore 64 computer.

The bestselling behind-the-scenes memoir of the royal family by a cousin who served in MI5—and as one of the Queen's bridesmaids. Includes photos! A Sunday Times number one bestseller in the United Kingdom, this is the intimate and revealing autobiography of Margaret Rhodes, first cousin of Queen Elizabeth II and niece of Queen Elizabeth, the Queen Mother. Margaret was born into the Scottish aristocracy, into a now almost vanished world of privilege. Royalty often came to stay, and her house was run in the style of Downton Abbey. During the Second World War, she "lodged" at Buckingham Palace while she worked for MI5. She was a bridesmaid at the wedding of her cousin, Princess Elizabeth, to Prince Philip. Three years later, the King and Queen attended her own wedding, in which Princess Margaret was a bridesmaid. In 1990, she was appointed as a lady-in-waiting to the Queen Mother, acting also as her companion, which she describes in touching detail. In the early months of 2002, she spent as much time as possible with her ailing aunt and was at her bedside when

she died. The next morning, she went to Queen Elizabeth's bedroom to pray, and in farewell dropped her a final curtsey. The Queen Mother regarded Margaret Rhodes as her "third daughter," and she has been extremely close to her cousins, the Queen and Princess Margaret, throughout their lives. Full of charming anecdotes, fascinating characters, and personal photographs, this is an unparalleled insight into the private life of the British monarchy. "Surprisingly addictive." —New Zealand Herald

## **Harald Hardrada**

With a foreword by four-time Oscar nominated filmmaker Michael Mann. The story of Paul LeRoux, the twisted-genius entrepreneur and cold-blooded killer who brought revolutionary innovation to international crime, and the exclusive inside story of how the DEA's elite, secretive 960 Group brought him down. Paul LeRoux was born in Zimbabwe and raised in South Africa. After a first career as a pioneering cybersecurity entrepreneur, he plunged hellbent into the dark side, using his extraordinary talents to develop a disruptive new business model for transnational organized crime. Along the way he created a mercenary force of ex-U.S. and NATO sharpshooters to carry out contract murders for his own pleasure and profit. The criminal empire he built was Cartel 4.0, utilizing the gig economy and the tools of the Digital Age: encrypted mobile devices, cloud sharing and novel money-laundering techniques. LeRoux's businesses, cyber-linked by his own dark worldwide web, stretched from Southeast Asia across the Middle East and Africa to Brazil; they generated hundreds of millions of dollars in sales of arms, drugs, chemicals, bombs, missile technology and murder. He dealt with rogue nations—Iran and North Korea—as well as the Chinese Triads, Somali pirates, Serb mafia, outlaw bikers, militants, corrupt African and Asian officials and coup-plotters. Initially, LeRoux appeared as a ghost image on law enforcement and intelligence radar, an inexplicable presence in the middle of a variety of criminal endeavors. He was Netflix to Blockbuster, Spotify to Tower Records. A bold disruptor, his methods brought international crime into the age of innovation, making his operations barely detectable and LeRoux nearly invisible. But he gained the attention of a small band of bold, unorthodox DEA agents, whose brief was tracking down drugs-and-arms trafficking kingpins who contributed to war and global instability. The 960 Group, an element of the DEA's Special Operations Division, had launched some of the most complex, coordinated and dangerous operations in the agency's history. They used unorthodox methods and undercover informants to penetrate LeRoux's inner circle and bring him down. For five years Elaine Shannon immersed herself in LeRoux's

shadowy world. She gained exclusive access to the agents and players, including undercover operatives who looked LeRoux in the eye on a daily basis. Shannon takes us on a shocking tour of this dark frontier, going deep into the operations and the mind of a singularly visionary and frightening figure—Escobar and Victor Bout along with the innovative vision of Steve Jobs rolled into one. She puts you in the room with these people and their moment-to-moment encounters, jeopardy, frustration, anger and small victories, creating a narrative with a breath-taking edge, immediacy and a stranger-than-fiction reality. Remarkable, disturbing, and utterly engrossing, *Hunting LeRoux* introduces a new breed of criminal spawned by the savage, greed-exalting underside of the Age of Innovation—and a new kind of true crime story. It is a look into the future—a future that is dark.

In December 1958, Ken Martin, his wife Barbara, and their three young daughters left their home in Northeast Portland to search for Christmas greens in the Columbia River Gorge—and never returned. The Martins' disappearance spurred the largest missing persons search in Oregon history and the mystery has remained perplexingly unsolved to this day. For the past six years, JB Fisher (*Portland on the Take*) has pored over the case after finding in his garage a stack of old Oregon Journal newspaper articles about the story. Through a series of serendipitous encounters, Fisher obtained a wealth of first-hand and never-before publicized information about the case including police reports from several agencies, materials and photos belonging to the Martin family, and the personal notebooks and papers of Multnomah County Sheriff's Detective Walter E. Graven, who was always convinced the case was a homicide and worked tirelessly to prove it. Graven, however, faced real resistance from his superiors to bring his findings to light. Used as a trail left behind after his 1988 death to guide future researchers, Graven's personal documents provide fascinating insight into the question of what happened to the Martins—a path leading to abduction and murder, an intimate family secret, and civic corruption going all the way to the Kennedys in Washington, DC.

One of the greatest medieval warriors Harald Sigurdsson, nicknamed Hardrada (Harold the Ruthless or hard ruler) fell in battle in an attempt to snatch the crown of England. The spectacular and heroic career which ended at Stamford Bridge in Yorkshire on 25 September 1066 had taken Harald from Norway to Russia and Constantinople and saw him gain a kingdom by force and determination rather than right or inheritance. He was one of the most feared rulers in Europe and was first and foremost a professional soldier, who acquired great wealth by plunder and showed no mercy to those he conquered. 'Harald Hardrada: The Warrior's Way' reconstructs a military career spanning three and a half decades and involving encounters with an extraordinary range of allies and enemies in sea-fights and land battles, sieges and viking raids across a variety of theatres of war. John Marsden's superbly researched and powerfully written account takes us from the lands of the Norsemen to Byzantium and the Crusades and makes clear how England moved decisively from three hundred years of exposure to the Scandinavian orbit to a stronger identification with continental Europe following the Norman invasion.

The dusty old town isn't even on the map. And for rancher Luke McCallister, that's just fine. Broken by tragedy, the stoic cowboy spends his time at his Ten Bar Ranch or down at Ima Jane's Rimrock Bar, trying to avoid the gossip being served along with the food and drink. But the everyday quiet of his life is shattered when he finds a human skull--and possibly the key to Glory's oldest mystery. ## **Lone Calder Star**

Scientists agree that over the last century the earth has become warmer. But do we really know why this has happened? A deftly written and enjoyable read, "The Chilling Stars" outlines a brilliant, daring and undoubtedly controversial new theory that will provoke fresh thinking about global warming. As prize-winning science writer, Nigel Calder and climate physicist Henrik Svensmark explain, an interplay of the clouds, the Sun and cosmic rays - sub-atomic particles from exploded stars - seems to have more effect on the climate than manmade carbon dioxide. This conclusion stems from Svensmark's research at the Danish National Space Center which has recently shown that cosmic rays play an unsuspected role in making our everyday clouds. And during the last 100 years cosmic rays became scarcer because unusually vigorous action by the Sun batted many of them away. Fewer cosmic rays meant fewer clouds and a warmer world. The theory, simply put here but explained in fascinating detail in the book, emerges at a time of intense public and political concern about climate change. Motivated only by their concern that science must be trustworthy, Svensmark and Calder invite their readers to put aside their preconceptions about manmade global warming and look afresh at the role of Nature in this hottest of world issues.

How Singapore's solutions to common problems can provide examples for other societies. Nearly everyone knows that Singapore has one of the most efficient governments and competitive, advanced economies in the world. But can this

unique city-state of some 5.5 million residents also serve as a model for other advanced economies as well as for the emerging world? Respected East Asia expert Kent Calder provides clear answers to this intriguing question in his new, groundbreaking book that looks at how Singapore's government has harnessed information technology, data, and a focus on innovative, adaptive governance to become a model smart city, smart state. Calder describes Singapore as a laboratory for solutions to problems experienced by urban societies around the world. In particular, he shows how Singapore has dealt successfully with education, energy, environmental, housing, and transportation challenges; many of its solutions can be adapted in a wide range of other societies. Calder also explains how Singapore offers lessons for how countries can adapt their economies to the contemporary demands of global commerce. Singapore consistently ranks at the top in world surveys measuring competitiveness, ease of doing business, protection of intellectual property, and absence of corruption. The book offers concrete insights and a lucid appreciation of how Singapore's answers to near-universal problems can have a much broader relevance, even in very different societies.

FINALIST FOR THE 2017 MAN BOOKER PRIZE \*\*The Guardian Best Books of 2017 \* December Indie Next Pick \* Amazon Best of the Month \* Amazon Debut Spotlight \* PEOPLE Magazine BOOK OF THE WEEK\*\* "Beguiling . . . A lyrical and mythic work . . . Mozley's sheer storytelling confidence sends the reader sailing." —New York Times "A quiet explosion of a book, exquisite and unforgettable." —The Economist "Part fairy tale, part coming-of-age story, part revenge tragedy with literary connections, Mozley's first novel is a shape-shifting, lyrical, but dark parable of life off the grid in modern Britain. Mozley's instantaneous success . . . is a response to the stylish intensity of her work, which boldly winds multiple genres into a rich spinning top of a tale."—Kirkus Reviews (starred review) The family thought the little house they had made themselves in Elmet, a corner of Yorkshire, was theirs, that their peaceful, self-sufficient life was safe. Cathy and Daniel roamed the woods freely, occasionally visiting a local woman for some schooling, living outside all conventions. Their father built things and hunted, working with his hands; sometimes he would disappear, forced to do secret, brutal work for money, but to them he was a gentle protector. Narrated by Daniel after a catastrophic event has occurred, Elmet mesmerizes even as it becomes clear the family's solitary idyll will not last. When a local landowner shows up on their doorstep, their precarious existence is threatened, their innocence lost. Daddy and Cathy, both of them fierce, strong, and unyielding, set out to protect themselves and their neighbors, putting into motion a chain of events that can only end in violence. As rich, wild, dark, and beautiful as its Yorkshire setting, Elmet is a gripping debut about life on the margins and the power—and limits—of family loyalty.
