Multistate Guide to Sales and Use Taxation: Construction provides guidance to construction contractors for dealing with the difficult sales and use tax issues inherent in their businesses, particularly if they operate in several states. In addition to the usual problems in complying with different bodies of law, administering a hodge-podge of state and local tax rates, and dealing with a variety of tax agency audit programs, the contract process and insufficient recordkeeping further complicate an already complicated task.

The Enhanced Guide for Occupational Exploration

This new book covers all the necessary tasks for gaining knowledge of collision repair and refinishing as outlined by NATEF. In-depth coverage includes structural and non-structural analysis and damage repair, welding, painting and refinishing, paint chemistry, sacrificial coatings for corrosion resistance, and more. The logical progression of topics and easy-to-understand style help convey the professional knowledge and technical know-how that readers need to employ on the job. A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.
