The First Americans

Computers and the General Practitioner

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

The Vivitar Guide

From the bestselling author of *I Didn't Do My Homework Because* comes an irresistible meditation on the quest for connection. When an elephant falls in love, he does many foolish things. He hides when the elephant-object of his affection is around. He writes dozens of letters that he will never send. And he tries to be healthy, but ends up finishing the

cheesecake. This soulful book is at once relatable and revealing, a reminder that love is worth striving for, and that the very best things in life will come to those who wait. Plus, this is the fixed format version, which looks almost identical to the print edition.

The Handbook of Social Indicators

Over much of the past century, the law governing third-party importation of non-counterfeit, genuine goods has been obscured by conceptual uncertainty. In recent years, the debate over the gray market has centered on the fundamental reasons for trademark protection, and has raised the possibility of conflict between the two traditionally recognized purposes of trademark law--protecting consumers from deception and protecting trademark owners from lost sales. Hiebert discusses the evolution of the universality and territoriality principles of trademark law, and develops a new understanding of the role of goodwill in resolving trademark infringement issues. Beginning with a review of the earliest days of trademark law, Hiebert traces the development of the twofold purpose and territoriality doctrines in the United States, and examines in detail the cases, statutes, and regulations governing parallel imports. Unlike other recent treatments of the subject, this work benefits from the availability of important archival materials, and devotes considerable attention to the nineteenth-century antecedents of modern parallel importation doctrine, and to the evolution of trademark doctrine within the broader context of American legal realism.

Was JFK a liberal hawk, who faced down the Russians over the Cuba crisis and made the other guy blink first? Or did he stand up to the pressures of his own military industrial complex and saved the planet, dying a martyr's death? As the New Cold War accelerates in intensity, the author asks whether any lessons in the career of JFK apply today

When an Elephant Falls in Love

Sketchbook

A remarkable, moving story about family and the many forms this can take, which will be loved by fans of Jodi Picoult and Susan Lewis. Fourteen-year-old Angie and her mum are on the brink of homelessness again. The problem is her little sister, Sophie. Sophie has a form of autism, and a tendency to shriek. Home never seems to last long. Until they move in with Aunt Vi, across the fence from a huge Great Dane. Sophie falls in love, and begins to imitate the dog's calm nature. The shrieking stops. Everyone relaxes. Until Paul, the dog's grumpy, socially isolated owner, moves away. Much to Angie's humiliation, her mum thinks they can follow Paul and his dog. Once reunited, despite a huge age gap, Angie and Paul form the closest friendship either has known. But Angie risks everything to help Paul's dream come true, even their friendship and her one chance at a real home - the only thing she's dreamed of since her father was killed. A place she won't be thrown out of. A place she can feel she belongs.
