The Wordsmith series is the value-priced option that students will appreciate while mastering key writing and grammar skills. Pam Arlov wrote a textbook series that counters many of the objections students had about textbooks, such as: Students find textbooks dry and tedious. Arlov includes thought-provoking chapter openers, plenty of visuals, and a conversational, engaging writing style that students really respond to. Students find textbooks irrelevant to their lives. Arlov's coverage of the rhetorical modes is realistic and models real-life writing. She includes "Real Writing" examples in the modes chapters to make Wordsmith relevant to students' lives. Students become frustrated if the entire text is not used in class. Wordsmith is 100 pages briefer than similar texts on the market and an affordable option. This more concise approach also does not overwhelm students with too much information. Wordsmith provides students with just the right balance of instruction and practice.

The Fourth Edition offers high-interest topics, meaningful visuals, clear learning objectives, a wealth of examples, and ample opportunities for students to practice applying new concepts to their own writing skills. \* The 8th Edition introduces sweeping changes to the philosophy and details of MLA works cited entries. Responding to the "increasing mobility of texts," MLA now encourages writers to focus on the process of crafting the citation, beginning with the same questions for any source. These changes, then, align with current best practices in the teaching of writing which privilege inquiry and critical thinking over rote recall and rule-following.

## **Lives on the Boundary**

It's a statistic that's sure to surprise: close to 45 percent of postsecondary students in the United States today do not enroll in college directly out of high school and many attend part-time. Following a tradition of self-improvement as old as the Republic, the "nontraditional" college student is becoming the norm. Back to School is the first book to look at the schools that serve a growing population of "second-chancers," exploring what higher education--in the fullest sense of the term--can offer our rapidly changing society and why it is so critical to support the institutions that make it possible for millions of Americans to better their lot in life. In the anecdotal style of his bestselling Possible Lives, Rose crafts rich and moving

vignettes of people in tough circumstances who find their way; who get a second . . . or third . . . or even fourth chance; and who, in a surprising number of cases, reinvent themselves as educated, engaged citizens. Rose reminds us that our nation's economic and civic future rests heavily on the health of the institutions that serve millions of everyday people--not simply the top twenty universities in U.S. News and World Report--and paints a vivid picture of the community colleges and adult education programs that give so many a shot at reaching their aspirations.

Since 9/11, the Jordanian Abu Muhammad al-Maqdisi (b. West Bank, 1959) has emerged as one of the most important radical Muslim thinkers alive today. While al-Maqdisi may not be a household name in the West, his influence amongst like-minded Muslims stretches across the world from Jordan - where he lives today - to Southeast Asia. His writings and teachings on Salafi Islam have inspired terrorists from Europe to the Middle East, including Abu Mus'ab al-Zarqawi, the former leader of al-Qa'ida in Iraq, and Ayman al-Zawahiri, Osama Bin Laden's successor as the head of al-Qa'ida Central. This groundbreaking book, which is the first comprehensive assessment of al-Maqdisi, his life, ideology, and influence, is based on his extensive writings and those of other jihadis, as well as on interviews that the author conducted with (former) jihadis, including al-Maqdisi himself. It is a serious and intense work of scholarship that uses this considerable archive to explain and interpret al-Maqdisi's particular brand of Salafism. More broadly, the book offers an alternative, insider perspective on the rise of radical Islam, with a particular focus on Salafi opposition movements in Saudi Arabia and Jordan.

### **Civics**

Featuring a new preface for the 10th anniversary As did the national bestseller

Nickel and Dimed, Mike Rose's revelatory book demolishes the long-held notion that people who work with their hands make up a less intelligent class. He shows us waitresses making lightning-fast calculations, carpenters handling complex spatial mathematics, and hairdressers, plumbers, and electricians with their aesthetic and diagnostic acumen. Rose, an educator who is himself the son of a waitress, explores the intellectual repertory of everyday workers and the terrible social cost of undervaluing the work they do. Deftly combining research, interviews, and personal history, this is one of those rare books that has the capacity both to shape public policy and to illuminate general readers.

## **The Effective Reader**

Registering for courses, securing financial aid, developing strong study skills, and mastering difficult course material are just a few of the wide variety of obstacles that college students must overcome on their path to graduation. Beyond inadequate academic preparation, first-generation college students may not be able to rely on family or friends for advice about higher education and thus face the additional burden of constructing a support network of mentors and advisors. Without suitable advice and counseling, these students may make decisions that adversely affect their circumstances—and thus, their education. Academic Language and Learning Support Services in Higher Education is an essential scholarly resource that examines the quality, organization, and administration of academic advisement and academic support systems for college and university students that connect them to the academic community and foster an appreciation of lifelong learning. Featuring a wide range of topics such as enrollment services, professional developments, and service learning, this text is ideal for academicians, academic advisers, mentors, curriculum designers, counsellors, administrators, higher education faculty, policymakers, researchers, and graduate students.
