Aloys Schmitt is best remembered for his Op. 16 exercises. The collection is divided into three sections. The first aids students in developing finger independence through a variety of single and double-note patterns within the range of a fifth. The second section emphasizes passing the thumb under fingers to prepare for scales and arpeggios. The final section provides traditional scales and arpeggios in a notated format with fingering.

In his major work on communism, the international bestseller *The Passing of an Illusion*, the eminent French historian François Furet devoted a lengthy footnote to German historian Ernst Nolte's interpretation of fascism. Nolte responded, a correspondence ensued, and the result was the remarkable exchange presented in this volume. *Fascism and Communism* offers readers the rare opportunity to witness and learn from a confrontation between two of the world's most distinguished

historians over one of the most serious subjects of our time. Each from a different perspective, Furet and Nolte offer compelling arguments for the common genealogy of these two ideologies as well as reasons for the intellectual community's rejection of this explosive thesis throughout the twentieth century. This discussion leads to a deeper understanding of the nature of totalitarianism as well as the trajectory and interpretation of modern European history.

Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on

its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what can companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which

has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.
