"The Adventures of Tom Sawyer" – Tom Sawyer lives with his Aunt Polly and his half-brother Sid. He skips school to swim and is made to whitewash the fence the next day as punishment. Tom falls in love with Becky Thatcher, a new girl in town, but shortly after Becky shuns him, he accompanies Huckleberry Finn to the graveyard at night, where they witness a trio of body snatchers getting into a fight. Tom and Huck run away to an island. While enjoying their new-found freedom, they become aware that the community is sounding the river for their bodies… "Adventures of Huckleberry Finn" – Huck Finn and his friend Tom Sawyer have each come into a considerable sum of money as a result of their earlier adventures. Huck is placed under the guardianship of the Widow Douglas, who is attempting to "sivilize" him. Finding civilized life confining, his spirits are raised somewhat when Tom helps him to escape one night, but his alcoholic father turns up and kidnaps him… "Tom Sawyer Abroad" – Tom, Huck, and their friend Jim set sail to Africa in a futuristic hot air balloon, where they survive encounters with lions, robbers, and fleas to see some of the world's greatest wonders, including

the Pyramids and the Sphinx. "Tom Sawyer, Detective" – Tom attempts to solve a mysterious murder in this burlesque of the immensely popular detective novels of the time. Although adolescents are the primary targets of bullying and violence in schools, their opinions about this national problem are rarely elicited. This exploratory case study of an upstate New York rural high school investigates the perceptions of 10th grade students about safety at school from a mixed methods approach. By chance, the research has captured pre and post Littleton, Colorado data in the form of surveys, individual interviews and focus groups. Using action research, youth-based phenomenology, and a general systems frame of reference, the study brings forward themes relevant to adolescents about the safety or hostility of their work environment--the school. These themes include institutional caring, peer predictability, and interpersonal respect. The study highlights the connection between bullying and eruptions of school violence. The inquiry explores the possibility that schools may be inadvertently perpetuating hostile climates through the maintenance of unhealthy systemic behavioral patterns. Due to the action research approach, the study further provides a voice for empowerment of students in their primary social setting for local policy change. It is the premise of the inquiry that despite the events of violence at rural schools such as Paducah, Jonesboro, and Springfield, few researchers are asking the primary stakeholders, the children, for input about their concerns relative to safety or for input regarding solutions for preventing school violence. The study has implications for educational policy decisions. Policy recommendations for increasing school safety and decreasing school violence are presented based on student solutions and the need for systemic change.

A generational shift is occurring at historic house museums as board members and volunteers retire while few young people step forward to take their place. These landmarks are also plagued by serious deferred maintenance, and many have no endowment funds. What will happen to these sites in the next ten years, and what can be done to assure their continued preservation for generations to come? In New Solutions for House Museums, Harris examines possible options and provides a decision-making methodology as well as a dozen case studies of house museums that have made a successful transition to a new owner or user.
